INDEX

For Volume 66

INDEX FOR VOLUME 66

AUTHOR AND SUBJECT INDEX. Junior authorship is indicated by page numbers in parentheses. Page numbers of illustrations are in boldface. Pages of errata are in italics. A special listing is made of "new diseases, species, and varieties."

Abney, T. S., (1405)
Abu-Samah, N., 215
Acer rubrum, Cytospora, Ceratocystis, and Phialophora spp. in wounded tissues of, 559
Aceria tulipae, on wheat, vector of wheat streak mosaic virus, host resistance to, 346
Acetobacter sp., in pineapple, interaction with other bacteria in pink disease, 396
Acetomonas sp., on pineapple fruit, possible cause of pink disease, 323
Acres, S., (790)
Acrobeloides buetschlii, on pea, Rhizobium leguminosarum interaction, 468, **471**
Adams, D. B., (1298)
Adams, P. B., (1203)
Addy, S. K., 1403
aerobiology
sampling apparatus, new 7-day sampler for, 60
spore release by Drechslera spp., letter to editor, 1265
three spore samplers compared, 62
aflatoxin (see **toxin**)
Agrobacterium tumefaciens
in peach, resistance to related to Cytospora, 212
on Prunus spp., disease development in, 1097
in radish, epidemiology of, 1328
on tomato, tumor cell penetration by hydrocarbons, 1460, **1461**
Agrostis palustris, Pythium blight of, pyroxychlor for control, 1033
air pollution (see **pollution, air-**)
Aist, J. R., 1050
Albizia julibrissin, Fusarium oxysporum perniciosum on, histopathology of, 839, **840, 841**
Aldwinckle, H. S., 1439
alfalfa
anthracnose of, competition of Colletotrichum spp. on, 538
Cylindrocladium floridanum on, inoculum potential in soil, 862
Phytophthora-Rhizobium interaction in roots of, 1413, **1414**
Phytophthora root rot of, factors affecting, 81
Stemphylium botryosum on
differentials for isolates of, 715
host-pathogen interaction, 749, **750**
Allen, R. M., (1198)
Allescheria sp., 15 tree spp. susceptible to, 1010
Allium cepa (see **onion**)
almond
leaf scorch bacterium of, cell wall topography, ultrastructure, 147, **149, 150**
leaf scorch disease of, transmission by leafhopper, 17, **18, 20, 22**
Alnus rubra, decay from soft rot, brown rot, and white rot fungi, 1010
Alon, H., (683)
Alternaria spp., on cotton, toxin from, bioassay of, 514
alternata lycopersici, host-specific toxin from, 165
brassicae, Nectria inventa parasitized by, 1056, **1057-1062**
brassicicola, on crambe seeds, virulence of, 945, **946**
solani
spore germination in, osmotic pressure effect on, 786
spore germination inhibited by fungicides, 363
on tomato, chlorothalonil as residue protection against, 1018
in tomato transplants, soil fumigation effects on, 1122
tenuis, on crambe seeds, 945
Altman, J., (1373)
Amaranthus retroflexus, Fusarium oxysporum betae on, 822, **823**
American Phytopathological Society
author's guide for manuscript preparation, 8
CIBA-GEIGY award, 7
fellows, 1
Ruth Allen award, 6
Anas cosmosus (see **pineapple**)
Anderson, G. R., (1028)
antibiotics
bacteriocin, Corynebacterium michiganense producing, 430
oxytetracycline, coconut palm lethal yellowing caused by, 1038
Aphanomyces
cochlioides, sugarbeet cultivars resistant to, 277
euteiches, on pea, disease development and pisatin production, 1174, **1178**
Aphis
citricola, on sweet potato, vector for veinclearing virus, 642

craccivora, peanut mottle virus transmitted by, 473
gossypii
citrus tristeza virus transmitted by, 1102
on sweet potato, vector for veinclearing virus, 642
Apium graveolens (see **celery**)
apple
collar rot complex, Pythium identified in, **127, 128**
collar rot of, oospore germination in Phytophthora, factors, 443
Erwinia amylovora on
cell wall decomposition by, 433
resistance of terminal shoots to, 1439
ultrastructural modifications by, 269, **272-276**
Erwinia amylovora in leaves of, electrolyte and phenol leakage caused by, 1403
fire blight cankers of, 317
scab of
epidemiology of conidial dispersal, 1313
Venturia inaequalis ascospores, trapping, 453
Arachis hypogaea (see **peanut**)
Aragaki, M., (546)
Arceuthobium campylopodum, on ponderosa pine, epidemiological simulation model, 888
Armillaria mellea
in ponderosa pine, persistence and distribution in, 1210, **1211, 1212**
survival in soil, heating or drying effects, 1363, **1365**
Armstrong, G. M., 542
Armstrong, J. K., (542)
Asay, K. H., (1445)
Ashworth, L. J., Jr., (883), 970, (978), (1449)
Aspergillus spp., aflatoxin production by, rapid detection, 1466
flavus
on corn, growth and aflatoxin production by, 675
on peanut pegs, field colonization of, 1161
japonicus
enzymes from, plant tissue maceration by, 281
pectolytic tissue maceration, factor, 1077
nidulans, sectoring induced in by fungicides, criterion of toxicity, 217
niger, on peanut pegs, field colonization of, 1161
parasiticus, on rough rice, relative humidity related to, 204
Avena sterilis (see also **oats**)
slow stem rusting of, mechanisms and stability of resistance in, 74
Ayers, W. A., (1203)
Aylor, D. E., 537, (1050)

Backman, P. A., 234, 1242
bacteria (see also under specific genera)
on almond, leaf scorch caused by, ultrastructure, 147, **149, 150**
on sweet potato roots, outgrowth induced in, 28, **31, 32**
Banihashemi, Z., 443, (1105)
Banttari, E. E., 896
Bar-Joseph, M., 835, (1102)
Barker, K. R., (468), 851, (1255)
barley
Cochliobolus sativus in soils of, conidial populations in, 1082
Helminthosporium gramineum on, temperature and soil water potential effects, 631
powdery mildew of, localization of resistance to, 901
Puccinia graminis tritici on, resistant to, 667
Rhynchosporium secalis on
race composition and frequency, 726
races in California, 719
slow rusting of, horizontal resistance concept in, evaluation, 494
stripe disease of, factors affecting inoculum and seed transmission, 295
Ustilago hordei on
correlation of two measures of disease, 1342
partial-vacuum method inoculation, 65
Verticillium albo-atrum in roots and residues of, 883
barley stripe mosaic virus, on barley, concentration and infectivity in, 1422
barley yellow dwarf virus
plant response to increased dosage, 646
storage of, freezing and lyophilization of preparations, 534
Barnett, H. L., (777)
BD 18654 (see **fungicides**, specific)
bean (see **Phaseolus vulgaris**)
bean common mosaic virus, in phasemy bean, seed transmission of, 1274
beet, Fusarium oxysporum on, 542
Belonolaimus longicaudatus, on legumes, histopathology of nodular tissue, 851, **852-854**
Bemisia tabaci, vector for sweet potato chlorotic stunt virus, 642
Bennett, A. H., (801)
benomyl (see **fungicides**, specific)
Benson, D. M., 883
Ben-Yephet, Y., 1252
Bertrand, P. F., 987, 1318, 1321
Betula papyrifera, Cytospora, Ceratocystis, and Phialophora spp. in wounded tissues of, 559
Beute, M. K., (1255)
Bielenin, A., 127
Bingham, F. T., (1398)
biological control
Bipolaris maydis, microbial antagonist for, 1214
Colletotrichum lagenarium and Cladosporium cucumerinum on cucumber, protection induced by prior inoculation, 790
Colletotrichum spp. on alfalfa, competitive inhibition among, 538
Cronartium spp. with Darluca filum, 1195
fire blight of pear, saprophytic bacteria for control, 1457
Phytophthora cinnamomi on pine seedlings, Trichoderma harzianum for, 1023
Pythium ultimum in sugarbeet spermosphere, nutrient factor, 312
snowmold on winter wheat, organic residue effect on, 1028
water hyacinth with Cercospora rodmanii, 914, **915**
Bipolaris
maydis (see also **Helminthosporium** maydis)
on corn, resistance affected by C and S cytoplasms, 336
microbial antagonists of, 1214
ravenelii, on Sporobolus poiretii, ovarian infection of, 260, **261, 262, 265, 267**
setariae, in chrysanthemum and rose, pathogenicity, 389
sorokiniana, on bluegrass, inoculum apparatus for, 360, **361**
Black, L. L., (958)
Black, L. M., (371)
Blakeman, J. P., (1310)
Blalock, T. E., (1229)
Blazquez, C. H., 1155
Blizzard, J. W., (534)
Bloom, J. R., 379
Bloomberg, W. J., 1090

blueberry, Monilinia vaccinii-corymbosi on, eradicant-protectant fungicide interaction on, 350, *1264*
bluegrass (see **Poa pratensis**)
Boccas, B., 477
Bolstad, J., (97)
Bonde, M. R., 1290
Boothroyd, C. W., (1169)
Borecki, Z., (127)
Borges, O. L., 715, 749
Botrytis
cinerea
on onion leaves, histology of, 1279, **1281-1286**
survival during composting with hardwood bark, 1369
squamosa, on onion leaves, histology of, 1279, **1281-1286**
Brakke, M. K., (1422)
Brassica pekinensis, soft-rot bacteria in, infectivity and survival, 1325
Braun, E. J., 598
Braverman, S. W., (1274)
Brewer, J., (828)
Brlansky, R. H., (815)
broad bean mottle virus, dissociation by sodium dodecyl sulfate, 1302, **1306**
brome mosaic virus, dissociation by sodium dodecyl sulfate, 1302
Bromfield, K. R., (461), (1290)
Brown, E. A., 111
Brown, M. B., (11)
Brown, M. F., (419)
Bruckart, W. L., 253
Bruehl, G. W., (1001)
Buchenauer, H., 1140
Burnett, P. A., 646
butyl triazole (see **fungicides,** specific)
Buzzell, R. I., (1361)
Byther, R. S., (423)

Cabezas de Herrera, E., 400
caladium, Pythium spp. on, pathogenicity compared, 704, **707**
Callbeck, L. C., (695)
Callihan, R. H., (228), (1236)
Calonectria crotalariae
in soil, biology of conidia, ascospores, and microsclerotia in, 51, **53**
spore germination inhibited by fungicides, 363
Calvert, O. H., (1120)
Cameron, H. R., 821
Campbell, C. L., 1373
Capsicum
annuum, powdery mildew of, description, 1155, **1156**
frutescens
capsidiol produced by leaves, 175
potato virus Y on, strain characteristics in, 576, **578**
captafol (see **fungicides,** specific)
captan (see **fungicides,** specific)
carbomoyltransferase (see **enzymes,** specific)
Carling, D. E., 419
Carlson, P. S., (931)
Carlson, R. M., (1321)
carnation ringspot virus
aggregation properties of, 34, **36**
dissociation by sodium dodecyl sulfate, 1302
carnation yellow fleck virus, purification, properties, and serology of, 835
Carroll, V. J., (1148)
carrot thin-leaf virus, host range, purification, and properties of, 949
Carter, W. W., (1348)
Carthamus tinctorius (see **safflower**)
Castello, J. D., 1431
Catalano, E. A., (678)
Cavariella aegopodii, carrot thin-leaf virus vector, 949
celery, Pythium polymorphon on, nematode interaction, 1224
Ceponis, M. J., (582)
Ceratocystis spp., in hardwood trees, in wounded tissues of, 559
fagacearum, in red oak seedlings, stomatal resistance in, 1295
fimbriata, in sweet potato, ipomeamarone stimulated by, 678
ulmi
elm hybrids resistant to, 1107
isolates of, variation in aggressiveness, 239
natural tolerance of isolates to MBC-HCl, 225
Cercospora
beticola
races C1 and C2 of, identification and distribution, 1158
on sugarbeet
benomyl resistance to, in Greece, 1452
infection related to stomata, 737, **739, 740**
canescens and cruenta, on cowpea, yield loss estimation model, 384
kikuchii, on soybean, purple seed stain caused by, factors affecting, 1045
rodmanii, water hyacinth controlled by, biological control, 914
Chandler, W. A., (379)
Chastagner, G. A., 924
Chin, S. H. F., 1082
chlorothalonil (see **fungicides,** specific)
Christen, A. A., (193)
Christensen, C. M., 204
chrysanthemum
Bipolaris setariae on, pathogenicity, 389
Mycosphaerella ligulicola on, races, geographic and selective factors, 1310
Chu, L., (1325)
citrus, Phytophthora parasitica on, zoospore survival in irrigation water, 1198, **1201**
citrus tristeza virus, transmission by melon aphid, 1102
Cladosporium cucumerinum, on cucumber, protection induced against, 790
Clark, C. A., 1279
Claviceps purpurea, honeydew from, water potential of, colonization effect, 449
clover yellow mosaic virus
lysosome distribution and phosphatase activity in, 588, **590-593**
in pea, aggregates in transfer cells, 594, **595, 596**
Cochliobolus
carbonum
ascus formation in, genetic inhibition of, 1354
semi-incompatibility in, 655
sativus, in soil, cereal crop effect on, 1082
cocksfoot mottle virus, dissociation by sodium dodecyl sulfate, 1302
coconut
mycoplasmalike organism in, oxytetracycline for control, 1148
oxytetracycline in, uptake, translocation, and persistence in, 1308

Cocos nucifera (see **coconut**)
coffee, rust of, spore germination inhibited by cinnamic acid derivatives, 765
Cole, H., Jr., (1033)
Collecephalus hemerocalli, on daylily, leaf streak caused by, 245, **246**
Colletotrichum
coccodes, in soil, survival, 640
dematium and destructivum, on alfalfa, interaction with other Colletotrichum spp., 538
gossypii, on cotton, toxin from, 514
graminicola
on corn
resistance evaluation in, 86, **87**
temperature and host effect on lesions, 635
lagenarium, in cucumber, induced protection against, 790
lindemuthianum, on cucumber, protectant against Cladosporium cucumerinum, 790
trifolii, on alfalfa, interaction with other Colletotrichum spp., 538
Collins, T. I., (60), (62)
Collins, W. W., 489
comoviruses, dissociation by sodium dodecyl sulfate, 1302
Converse, R. H., 381
Conway, K. E., 914
Cook, A. A., (717)
Cook, R. J., 193
Coriolus versicolor, 15 tree spp. susceptible to, 1010
corky stunt, on tomato, genetic disease in, 132, **133**
corn
aflatoxin B_1 in preharvest development of, 1120
anthracnose of, resistance evaluated in, 86, **87**
Aspergillus flavus on, growth and aflatoxin production by, 675
Bipolaris maydis on
microbial antagonist from, 1214
resistance affected by C and S cytoplasms, 336
Colletotrichum graminicola on, lesion development affected by temperature and maturity, 635
Helminthosporium leaf diseases of, yield loss from, 942
Helminthosporium maydis race T on, ecological races of, 873
Phyllosticta maydis on, suscept-pathogen relation, 1169, **1171**
seed injury to, leakage, infection, and emergence, 928
Corynebacterium michiganense
bacteriocin produced by, 430
survival during desiccation, 1334
on tomato, resistance genetics of, 1116
Cother, E. J., 828
Cotoneaster pannosa, Erwinia amylovora on, cell wall decomposition by, 433
cotton
Ramularia areola on, resistance to, 1007, **1008**
Rhizoctonia solani in seedlings of, peroxidase localization in, 1072, **1073**
Rhizoctonia solani on, growth and yield effect, 111
toxigenic fungi from seeds and bolls of, 514
Verticillium albo-atrum on, copper-induced fungistasis in sclerotia of, 970
Verticillium wilt of
effect of growth retardant Pydanon on, 1140
suppression by growth retardant, 106
Couch, H. B., (806)
Cowling, E. B., (1229)
cowpea
Cercospora leaf spot, yield loss estimation model, 384
Phytophthora on, single-gene resistance related to phytoalexin, 426
southern bean mosaic virus on, in cultivars of, synthesis, movement, and localization of, 1298
cowpea chlorotic mottle virus, dissociation by sodium dodecyl sulfate, 1302
Crambe abyssinica, Alternaria brassicicola on, virulence of, 945, **946**
Criconemoides xenoplax, on peach, tree short-life complex associated with, 689, **691**
Crill, P., (1339)
Crinipellis perniciosa (see **Marasmius perniciosus**)
Cronartium
comandrae, aeciospores of, germination self-inhibitor from, 1395
fusiforme
Darluca filum infecting, on oak leaves, 1195, **1196**
on slash pine
histopathology, 741, **742, 743, 746, 747**
increased virulence in, 511
on slash pine seedlings, resistance and compatibility types, 1229, **1230, 1231, 1233**
strobilinum, Darluca filum infecting, on oak leaves, 1195, **1196**
crown gall (see **Agrobacterium tumefaciens**)
Cryptoporus volvatus, on Douglas-fir beetle, isolation from, 1431
cucumber
Colletotrichum lagenarium and Cladosporium cucumerinum on, induced protection from, 790
Pseudomonas lachrymans on leaves of, rain and dew effect on, 1219
cucumber mosaic virus
dissociation by sodium dodecyl sulfate, 1302
on wheat hosts, near lettuce and celery fields, 253, **254, 256, 257**
Cucumis melo (see **muskmelon**)
Cucurbita maxima (see **squash**)
Cunfer, B. M., 449, (1375)
Cylindrocladium spp., production of microsclerotia in, factors affecting, 777, **779**
crotalariae, microsclerotia of, isolation technique from soil, 1255
floridanum
inoculum potential of, quantitative assay for, 862
in soil, plant residue and chemical treatment effects on, 1085, **1087**
Cytospora spp.
in hardwood trees, in wounded tissues of, 559
on peach, fungicides for, 1125
on ponderosa pine, histology and culture characters, 25, **26**
cincta
on peach, resistance to related to Agrobacterium tumefaciens, 212
on prune, resistance affected by inoculation date, 206
leucostoma
on French prune
soil physical and fertility effects, 1321, **1322**
water relations, 1318

Dactylis glomerata, Puccinia graminis dactylidis on, single-plant basis for rating general resistance to, 1445
Dactylomyces crustaceous, 15 tree spp. susceptible to, 1010
Daines, R. H., 582
Dale, J. L., (531)
Dalmacio, S. C., 655, 1354

Darbeyshire, B., (828)
Darley, E. F., (1363)
Darluca filum
Cronartium spp., parasitized by on oak leaves, 1195, **1196**
Puccinia graminis parasitized by, host-parasite interface, 419, **420**
Davis, D. W., (1105)
Davis, J. R., 228, 1236
Davis, N. D., (514)
Dawson, W. O., 177, 437, 625
Day, P. R., (537)
Delgado, J. C., 717
Dendroctonus pseudotsugae, on Douglas fir, Cryptoporus volvatus and Fomes pinicola isolated from, 1431
Derrick, K. S., 815
Devine, T. E., (538)
Dianese, J. C., (1466)
Diaporthe phaseolorum sojae, on soybean, benomyl effect on, in fields, 680
Diener, U. L., 514
dinoseb (see **fungicides,** specific)
Dinus, R. J., (511)
Diplodia tubericola, in sweet potato, ipomeamarone stimulated by, 678
Dithane (see **fungicides,** specific)
dodine (see **fungicides,** specific)
Doke, N., (1186)
Dovas, C., 1452
Dow, R. L., (1203)
Draeculacephala minerva, almond leaf scorch vector, 17
Drechslera spp., spore release by, letter to editor, 1265
Dreikorn, B. A., (1135)
Duniway, J. M., 877
Durbin, R. D., (1295)
Dutch elm disease (see **Ceratocystis** ulmi)

---

early blight of tomato (see **Alternaria** solani)
Ebba, T., (1342)
Echandi, E., 430
Eddyvean, J., (629)
eggplant, root pathogens controlled by solar heat under plastic mulch, 683
Eichhornia crassipes, Cercospora rodmanii on, biological control agent, 914, **915**
electron microscopy (see also **ultrastructure**)
almond leaf scorch bacterium, cell wall topography, 147, **149, 150**
almond leaf scorch pathogen, 17, **18, 20**
Alternaria brassicae parasitized by Nectria inventa, 1056, **1057-1062**
broad bean mottle virus, sodium dodecyl sulfate effect, 1302, **1306**
carnation ringspot virus aggregates, 34, **36**
carnation yellow fleck virus, 835, **837**
chlorothalonil preparation, 1242, **1244**
clover yellow mosaic virus, on pea, aggregates in transfer cells, 594, **595, 596**
crown gall of tomato, hydrocarbon penetration of tumor cells, 1460, **1461**
Erwinia carotovora, L-phase of, 400, **402-404**
fire blight toxin on apple, 269, **272-276**
Guinea grass mosaic virus, member of potato virus Y group, 954, **956**
hydrangea virescence agent, filamentous form morphology, 608, **609, 611, 613, 614**
Marssonina panattoniana on lettuce, 669, **671**
Mycoplasma gallisepticum, in pea, evidence for nonpathogenicity, 1163, **1166**
mycoplasmalike organism in plants, fixation method for, 531, **532**
oat blue dwarf virus, in aster leafhopper, 896, **897, 898**
potato leaflet stunt, bacterialike organism associated in, fine structure, 564, **566, 567**
Pseudomonas spp. in tobacco leaf tissue, incompatible, compatible, and saprophytic spp. compared, 754, **759-764**
Rhizobium infection in soybean root nodules, 1065, **1068-1071**
Uromyces phaseoli, appressoria, 136, **139-143**
viruses and mycoplasmas assayed by serological specificity, 815, **816-819**
Ellingboe, A. H., (1435)
Ellis, M. A., (355), 680, 1249
elm
Ceratocystis ulmi on, variability and aggressiveness of isolates, 239
phloem necrosis of, histopathology in, 598, **599, 600, 602-606**
Emge, R. G., 1406
Endocronartium harknessii, phenology and control, 1246
endo-pectate lyase (see **enzymes,** specific)
endo-pectic lyase (see **enzymes,** specific)
endo-polygalacturonase (see **enzymes,** specific)
Endothia spp., osmotic water potential relation to growth 1418
Engelhard, A. W., 389
English, H., (987), (1318), (1321)
Enterobacter sp., in pineapple, interaction with other bacteria in pink disease, 396
enzymes (general) (see also **enzymes,** specific)
pectolytic-, Aspergillus japonicus stimulated by, 1077
enzymes (specific) (see also **enzymes,** general)
carbomoyltransferase, in bean leaves infected with Pseudomonas phaseolicola, 290
endo-pectate lyase, Hypomyces solani cucurbitae source, multiple forms of, 40
endo-pectic lyase, from Aspergillus japonicus, tissue maceration by, 281
endo-polygalacturonase, from Aspergillus japonicus, tissue maceration by, 281
peroxidase, in tobacco with TMV, polyanion-induced interference, 1192
epidemiology
Armillaria mellea in ponderosa pine forest, 1210, **1212**
Cercospora leaf spot on cowpea, yield loss estimation model, 384
Cochliobolus sativus, conidial population in soil after cereals, 1082
crown gall in radish, 1328
ergot honeydew, microflora affected by water potential, 449
Erwinia amylovora on apple and pear cankers, 317
Fusarium oxysporum on sugarbeet, new weed hosts of, 822, **823**
Helminthosporium maydis race T on corn, ecological races of, 873
mistletoe on ponderosa pine, simulation model for, 888
multilines and "super races," letter to editor, 937
Phakopsora pachyrhizi, temperature and moisture effects on, 461
Phytophthora cinnamomi dispersal in Hawaii, 457
pink disease of pineapple fruit, 323
Puccinia graminis tritici, on wheat, slow rust of, modeled, 55

Pythium spp. in field soil, 1203
Rhynchosporium secalis on barley, races in Calif., 719
Septoria tritici on wheat, meteorological factors, 781
slow leaf-rusting in wheat, components of, 1356
spore dispersal mechanism, in Helminthosporium maydis, 1050, **1051**
stripe rust of wheat, predictive model for losses in, 1406
Venturia inaequalis on apple, factors affecting conidial dispersal, 1313
Eppstein, D. A., 1395
errata, vol. 66, 351, 1264
Erwin, D. C., 106, (172), (1140)
Erwinia
amylovora
on apple, resistance to in terminal shoots, 1439
on apple leaves, electrolyte and phenol leakage by, 1403
in apple stems, ultrastructural modifications by, 269
cell wall decomposition by, polysaccharide degradation absent in, 433
in pear, bactericides vs. saprophytic bacteria, 1457
on pear and apple, in New York, 317
carotovora
in Chinese cabbage, infectivity and survival, 1325
isolation from agricultural soil, enrichment technique for, 367
L-phase of, UV induction of, 400, **402-404**
survival during desiccation, 1334
carotovora chrysanthemi, in chrysanthemum, survival during composting with hardwood bark, 1369
Erysiphe
graminis, on barley, localized host resistance, 901
graminis tritici
on wheat
compatible host-parasite genotypes, 1435
yield reduction by, multiple regression for, 1375
Eshel, Y., (517)
Eslyn, W. E., 1010
ethazol (see **fungicides**, specific)
Euonymus radicans, Phytophthora citrophthora on, 309
Eversmeyer, M. G., (60), 62
Eyal, Z., 11, (485)

Fagus grandifolia, Cytospora, Ceratocystis, and Phialophora spp. in wounded tissues of, 559
Farley, J. D., 640
Ferbam (see **fungicides**, specific)
Ferreira, S. A., 1151
Finney, R. E., (781)
Fischer, H. U., (1391)
Fisher, D. E., 942
flax, rust, genetics of resistance to, 661
Florance, E. R., (1163)
Fomes pinicola, on Douglas-fir beetle, isolation from, 1431
Foor, S. R., (1249)
Ford, R. E., (332)
French, D. W., (826), (1085)
Froyd, J. D., 1135
fumigants
chloropicrin-methyl bromide, for Verticillium wilt of pistachio, in California, 1449, **1450**
soil, Sclerotium rolfsii in tomato transplants controlled by, 910
fungicides (general) (see also **fungicides**, specific)
aromatic hydrocarbons, toxicity estimated by sectoring in Aspergillus, 217
eradicant and protectant, interaction vs. Monilinia on blueberry, 350
Macrophomina phaseolina sclerotia affected by 10 fungicides in soil, 355
nonaqueous vehicle for systemic fungicides in soybean seeds, 1249
postharvest decay of peach, relation to cooling, 801
spore germination inhibited by, in Alternaria, Calonectria, and Helminthosporium, 363
systemic-, on nontarget turfgrass, epidemiology of, 806
fungicides (specific) (see also **fungicides**, general)
BD 18654, uptake and translocation in soybean, 102
benomyl
effect in soils on bean sensitivity to air pollutants, 731
interaction with dinoseb and Monilinia on blueberry, 350, *1264*
Leucostoma canker of peach protected by, 1125
on soybean, effect on seed-borne fungi, 680
spore germination affected by, 363
sugarbeet resistance to Cercospora, in Greece, 1452
Verticillium malthousei tolerant to, acid a possible basis for, 1144
butyl triazole, for wheat leaf rust, systemic seed treatment, 1129
captafol, Leucostoma canker of peach protected by, 1125
captan
interaction with dinoseb and Monilinia on blueberry, 350, *1264*
spore germination inhibited by, 363
stone fruits injured by preharvest sprays, after postharvest treatment, 924, **925**
chlorothalonil
efficacy of, particle size and distribution related to, 1242
on tomato, residues protective against Alternaria solani, 1018
dinoseb, interaction with protectants vs. Monilinia on blueberry, 350, *1264*
Dithane, spore germination inhibited by, 363
dodine, tolerance of Venturia inaequalis for, 918
ethazol
metabolic mechanism for tolerance to, 152
respiratory inhibition in Pythium spp., 158
Ferbam, interaction with dinoseb and Monolinia on blueberry, 350, *1264*
maneb, Endocronartium harknessii on Scotch pine controlled by, 1246
MBC-HCl, natural tolerance to Ceratocystis ulmi isolates, 225
methyl bromide, effect on inoculum potential of Cylindrocladium floridanum, 862
oxamyl, tobacco black shank controlled by, 221
pyroxychlor, Pythium blight of bentgrass controlled by, 1033
thiazolyl-benzimidazole, spore germination inhibited by, 363
thiophanate-methyl, uptake and translocation in soybean, 102
tricyclazole, systemic for rice blast control, 1135
triforine, interaction with dinoseb and Monilinia on blueberry, 350, *1264*
fungistasis
copper-induced-, in Verticillium albo-atrum in cotton, 970
Cronartium comandrae, self-inhibitor in aeciospores of, 1395
Furniss, M. M., (1431)
Fusarium spp., on vegetable seedlings, dinitroaniline herbicide effect on, 517
moniliforme
on corn, picnic beetle association, 328

in pineapple, cultivars resistant to, 1386
nivale, on winter wheat, organic residue effect on, 1028
oxysporum
on corn, picnic beetle association, 328
on cotton, toxin from, 514
in forest nursery soil, distribution and pathogenicity of, 1090
f. spp. of, common hosts, 542
in spinach, etiology and control, 1267
in sweet potato, ipomeamarone stimulated by, 678
oxysporum batatas, on sweet potato, resistance to, 489
oxysporum betae
host range of, expanded, 822
on sugarbeet, processed and nonprocessed seed, 868, **869**
oxysporum lycopersici
in soil, control by solar heat under polyethylene mulch, 683
on tomato, Meloidogyne incognita not related to infection by, 1339
oxysporum melonis
on muskmelon, race identification of, 15
races of, proposed nomenclature for, 1105
oxysporum perniciosum, on mimosa, histopathology of, 839, **840**, **841**
oxysporum pisi, on pea, plant age effect on wilt, 1093
roseum
on cereals, temperature-water potential effect on growth, 193
on spinach, etiology and control, 1267
solani
on corn, picnic beetle association, 328
osmotic water potential effect on growth, 1418
on spinach, etiology and control, 1267
solani pisi, on pea, soil factors affecting, 188

Gaeumannomyces graminis tritici, on cereals, temperature-water potential effect on growth, 193
Ganoderma applanatum, 15 tree spp. susceptible to, 1010
Garcia Jurado, O., (400)
Gardner, M. W., (380)
Garren, K. H., (1161)
genetic diseases, corky stunt of tomato, 132, **133**
genetics of disease
Puccinia striiformis, additive-resistant gene for control, 794
tomato to Corynebacterium michiganense, 1116
genetics of fungi, Typhula idahoensis, sexual incompatibility and virulence, 1001
genetics of microorganisms
bacteriocin useful in bacterial typing, 430
Cochliobolus carbonum, semi-incompatibility in, single-gene control, 655
Erysiphe graminis tritici on wheat, compatible host-parasite genotypes, 1435
Phytophthora cinnamomi, mating type distribution, 701
Rhizoctonia solani, role of H locus in heterokaryosis, 1348
Venturia inaequalis, resistance to dodine, inheritance of, 918
Georgopoulos, S. G., 217, (1452)

Botrytis cinerea and B. squamosa on, histopathology compared, 1279, **1281-1286**
Pseudomonas aeruginosa on, internal brown rot from, **828, 831**
Opgenorth, D. C., (317)
Orellana, R. G., 464
Osman, S. F., (964)
Ostrofsky, W. D., (710)
Otta, J. D., 249
Ou, S. H., (906), (1018)
Ouchi, S., 901
Overman, A. J., (1339)
oxamyl (see **fungicides,** specific)

Pafford, J. L., (1135)
Paget, C. J., (1135)
Paguio, O. R., 473
Paliwal, Y. C., 406
Palomar, M. K., 1422
Panicum spp., resistance of 21 spp. to St. Augustine decline virus, 215
maximum, Guinea grass mosaic virus on, new member of potato virus Y group, 954, **955, 956**
Papavizas, G. C., (1203)
Papulospora sp., 15 tree spp. susceptible to, 1010
Paratylenchus projectus, on celery, no parasitic interaction with soil microflora, 1224
Parlange, J.-Y., (786), (1050)
Parlevliet, J. E., 494
Partridge, J. E., 426
Patil, S. S., (290)
Pavek, J. J., (228)
pea
Acrobeloides buetschlii interaction with Rhizobium leguminosarum, 468, **471**
Aphanomyces euteiches on, pisatin relation, 1174, **1178**
clover yellow mosaic virus on, aggregates in transfer cells, 594, **595, 596**
Fusarium wilt of, plant age effect on severity, 1093
Mycoplasma gallisepticum in, evidence for nonpathogenicity, 1163, **1166**

pisatin production, sodium azide induction of mutant for, 629
seed and seedling rot of, soil factors affecting, 188
seed exudates from, factors related to seed and seedling rot, 182

peach
bacterial canker of, short-life complex of trees associated with, 689, **691**
bark- and wood-grooving disease of, graft-transmissible agent in, 729, **730**
injury to, by preharvest captan sprays followed by postharvest treatment, 924
postharvest control of decay by cooling and fungicides, 801
pea early-browning virus, Morocco isolate, physical and serological properties of, 1391, **1392, 1393**
peanut, Aspergillus spp. on, field colonization of pegs, 1161
peanut mottle virus, aphid transmission of, 473
pear
Erwinia amylovora on
cell wall decomposition by, polysaccharide degradation absent in, 433
flowers of, bactericides vs. saprophytic bacteria, 1457
fire blight cankers on, 317
Pelargonium hortorum, tomato ringspot virus on, histopathology of, 844, **846-848**
Pell, E. J., 731, 856
Peng, J. H., 958
Penicillium sp., 15 tree spp. susceptible to, 1010
funiculosum
on pineapple
cultivars susceptible to, inoculation technique, 1386
etiology of, 392
pepper (see **Capsicum** annuum)
Person, C. O., (65), (1342)
Pfeiffer, J. B., (392), (396), (1386)
Pfeiffer, P., (954)
Phakopsora pachyrhizi
on soybean
germination and infection factors, 461
histopathology, 1290, **1291**
Phalaris arundinacea
Helminthosporium catenarium on, host reaction and resistance to, 498
papillae formation in, histochemistry related to noninfectious fungi, 503, **505**
Phanerochaete chryosporium, 15 tree spp. susceptible to, 1010
Phaseolus vulgaris
benomyl soil treatment for, effect on PAN and ozone activity, 731
Pseudomonas phaseolicola on, growth and toxin produced in cultivars of, 290
Pythium spp. on, ecology and epidemiology of, 1203
Rhizoctonia solani on, resistance affected by seed coat factors, 342
rust of, appressorium formation in, 136, **139-143**
Phialophora spp., in hardwood trees, in wounded tissues of, 559
Phipps, P. M., 839, 1255
Phyllosticta maydis, on corn, suscept-pathogen relation, 1169, **1171**
physiology of disease (see also **physiology of** microorganisms)
clover yellow mosaic virus, lysosome distribution and phosphatase activity in white clover, 588, **590-593**
Erwinia amylovora in apple, cell wall decomposition by, absence of polysaccharide degradation, 433
Erwinia amylovora in apple leaves, electrolyte and phenol leakage in, 1403
hardcore of sweetpotato, pectin modification in, 582
pea seeds and seedling rot, factors related to, 182
Rhizoctonia on cotton, peroxidase localization in seedlings of, 1072, **1073**
physiology of microorganisms (see also **physiology of** disease)
Alternaria solani, osmotic pressure effect on germination, 786
Hemileia vastatrix in coffee, spore germination inhibition by cinnamic acid derivatives, 765
Phytophthora cactorum, oospore germination factors, 443
Phytophthora capsici, cytochromes in mycelium and oospores of, 172
Phytophthora cinnamomi, osmotic potential and ion effect on growth, 1398
Phytophthora spp., interspecific crosses of P. parasitica and P. cinnamomi, 477, **480**
phytoalexin (see also **toxin**)
capsidiol, in pepper leaves, Phytophthora spp. relation, 175
elicitor or inducer, host fungus reaction, letter to editor, 940
ipomeamarone, in sweet potato, fungi related to concentration of, 678
kievitone; cowpea resistance affected by Phytophthora vignae, 426
pisatin, in pea
infected with Aphanomyces euteiches, 1174, **1178**
sodium azide-induced mutants for, 629
in potato tuber tissue, Phytophthora infestans, 1186
Phytophthora
cactorum, oospore germination in, factors affecting, 443
cambivora, on sweet cherry, root and crown rot caused by, 549, **551, 553, 556**
capsici
cytochromes in mycelium and oospores of, 172
on macadamia, blight caused by, 546, **547**
on pepper, incompatible interactions with, 175
cinnamomi
dispersal in Hawaii, 457
on Douglas-fir, other Phytophthora spp. in root rot of, 710, **711**
interspecific cross with P. parasitica, 477
mating type A^1, geographic and host range distribution of, 701
ohia decline associated with, in Hawaii, 116
osmotic potential and ion effect on growth of, 1398
on pine, biocontrol with Trichoderma harzianum, 1023
survival during composting with hardwood bark, 1369
variability in growth of, temperature relation, 982
citrophthora
in nurseries, survival and host range, 309
on Pieris japonica, infection and dissemination, 302
cryptogea
on Douglas-fir, other Phytophthora spp. in root rot of, 710, **711**
in soil, zoospore movement factors, 877
drechsleri
on Douglas-fir, other Phytophthora spp. in root rot of, 710, **711**
on sweet cherry, feeder root necrosis of, 549, **551, 553, 556**

infestans
on pepper, incompatible reaction with, 175
on potato
interplot interference effects representational errors, in fields, 695
R-3 gene effect on, 964
in potato tubers, rishitin and lubimin formation and transformation, 1186
on tomato, proteinase inhibitor increased in, 958
megasperma
on alfalfa
factors affecting, 81
interaction with Rhizobium meliloti, 1413, **1414**
on sweet cherry, root and crown rot caused by, 549, **551, 553, 556**
megasperma sojae, new races 5 and 6, cultivar reaction, 1361
parasitica, in irrigation water, zoospore survival mechanisms, 1198, **1201**
parasitica nicotianae
on tobacco
oxamyl treatments for, 221
resistance gene for, 91
tobacco seedlings screened for resistance to, 70
vignae, on cowpea, single-gene resistance related to phytoalexin, 426
phytotoxin (see **toxin**)
Picea spp., decay from soft rot, brown rot, and white rot fungi, 1010
Pieris japonica, Phytophthora citrophthora on, 302, 309
pine (see **Pinus spp.**)
pineapple
Fusarium and Penicillium in fruit of, susceptibility to, 1386
Penicillium funiculosum on, field inoculation, 392
pink disease of
epidemiology, 323
interaction of four bacteria in, 396
Pinkas, Y., (1252)
Pinus spp., decay from soft rot, brown rot, and white rot fungi, 1010
echinata, damping-off of, Trichoderma harzianum as biocontrol, 1023
elliottii elliottii
Cronartium fusiforme on
histopathology of infection, 741, **742, 743, 746, 747**
seedling resistance types, 1229, **1230, 1231, 1233**
virulence increased in resistant lines, 511
ponderosa
Armillaria mellea on, persistence and distribution in forest of, 1210, **1212**
Cytospora sp. on, histology, 25, **26**
mistletoe of, simulation model for, 888
sylvestris, Endocronartium harknessii on, chemical control of, in Pennsylvania, 1246
Piricularia oryzae, on rice, control for, tricyclazole, 1135
pistachio, Verticillium albo-atrum on, control in California, 1449, **1450**
Pisum sativum (see **pea**)
Plendomus destruens, in sweet potato, ipomeamarone stimulated by, 678
plum, Pratylenchus vulnus on seedlings of, gnotobiotic culture, 1276
Poa pratensis
Bipolaris sorokiniana on, inoculation technique, 360, **361**
Ustilago striiformis and Urocystis agropyri on, comparative susceptibility in cultivars, 1111
Pollack, F. G., (669)
pollution, air-
on bean, effect in benomyl-treated soil, 731
ozone
potassium-deficient effect on tomato, 734
soybean foliage injury by, histopathology of, 856, **858-860**
Populus balsamifera, decay from soft rot, brown rot, and white rot fungi, 1010
Poria placenta, 15 tree spp. susceptible to, 1010
postharvest diseases
Marssonina panattoniana on lettuce, 669
peach decay, control by cooling and fungicides, 801
potato
common scab of
fertilizer effects, 1236
fungicides vs. soil moisture effects, 228
late blight experimental plots, representational errors from interplot interference, 695
leaflet stunt, new bacterial disease in Israel, 564, **566, 567**
Phytophthora infestans on
phytoalexins in tuber tissue of, 1186
R-3 gene effect, 964
potato virus Y
acquisition factor in, relation to tobacco etch virus, 652
on pepper, strain characterization, 576, **578**
Poucher, C. P., (1148)
Powers, H. R., Jr., (1229)
Prasad, K., 342
Prasad, M. N., 631
Pratt, R. G., 81, 710
Pratylenchus
penetrans
in soil, effect of nitrogenous materials and wetting agents on survival of, 798
on sunflower, leaf diffusive resistance of, 967
in sunflower roots, electrical resistance reduced by, 1262
on tobacco, interaction with Tylenchorhynchus claytoni, 1427
vulnus, on plum seedlings, gnotobiotic culture, 1276
Preczewski, J. L., (1439)
Price, D. W., 46
Provvidenti, R., 1274
prune
Cytospora canker of
soil physical and fertility effects, 1321, **1322**
water relations, 1318
Cytospora cincta on, resistance affected by inoculation date, 206
Valsa leucostoma on, spore dispersal in, 987, **988, 989**
Prunus spp., crown gall development in seedlings of, 1097
amygdalus (see **almond**)
avium (see **sweet cherry**)
domestica (see **prune**)
Pseudomonas
aeruginosa, on onion, internal brown rot caused by, **828, 831**
fluorescens, in tobacco, immobilization in leaf tissue, 754
glycinea, survival during desiccation, 1334
lachrymans
on cucumber leaves, rain and dew effects on, 1219
on leaf surfaces, adsorption, survival, and infectivity, 992
phaseolicola, on bean, growth and toxin production in leaves of, 290
pisi, in tobacco, immobilization of, 754
solanacearum, in soil, persistence of, 998
syringae
morphological mutants of, 249
on sweet potato, outgrowth induced in roots of, 28

tabaci, in tobacco, reaction compared with other bacteria, 754
Pseudotsuga menziesii
Dendroctonus pseudotsugae on, vector for Cryptoporus and Fomes, 1431
Fusarium oxysporum in soil of, 1090
root rot of, Phytophthora spp. associated with, 710, **711**
soft rot, brown rot, and white rot fungi causing decay of, 1010
Puccinia
coronata, on Lolium, fungicide increased pathogenicity of, 806
graminis
Darluca filum parasitic on, host-parasite interface, 419, **420**
on wheat, virulence vs. rye genes, 664, **665**
graminis avenae, on Avena sterilis, slow stem rust resistance to, 74
graminis dactylidis, on orchardgrass, general resistance, single-plant basis for rating of, 1445
graminis tritici
on barley, resistance to, 667
uredospore dissemination of, long-distance spread in India, weather affecting, 198
on wheat, slow stem rust of, two epidemiological models, 55
helianthi, on sunflower, resistance to in North Central U.S., 208
hordei, on barley, horizontal resistance concept, 494
recondita, on wheat, systemic fungicide for, 1129
recondita tritici, on wheat, slow leaf-rusting in, epidemiology, 1356
recondita triticina, on wheat, yield reduction by, multiple regression for, 1375
striiformis
on wheat
control by additive gene, 794
epidemiology in Oregon, 1406
Pueppke, S. G., 1174
Puhalla, J. E., 1348
Pyricularia grisea, perithecial development and nuclear behavior in, 122, **123**, **124**
pyroxychlor (see **fungicides**, specific)
Pyrus communis (see **pear**)
Pythium spp.
ethazol inhibition of respiration, 158
ethazol tolerance to, mechanism of, 152
in field soil, ecology and epidemiology of, 1203
on grasses, pyroxychlor for control, 1033
graminicola, serological identification of, fluorescent antibody reagent for, 523
irregulare
on soybean, P. myriotylum compared to, 1380, **1381**
in spinach, etiology and control, 1267
survival in composting with hardwood bark, 1369
myriotylum
on caladium, pathogenicity compared with P. irregulare and P. splendens, 704, **705**, **707**
on soybean, P. irregulare compared to, 1380, **1381**
ultimum
on apple, collar rot complex in, **127**, **128**
on Lolium, fungicides ineffective against, 806
on pea seed, factors affecting in soil, 188
on sugarbeet, stimulation in spermosphere, chitin factor, 312

Quercus
palustris, Endothia spp. and Fusarium solani on, osmotic water potential relation, 1418
rubra
Ceratocystis fagacearum in seedlings, stomatal resistance, 1295
Cytospora, Ceratocystis, and Phialophora spp. in wounded tissues of, 559

Raabe, R. D., (380)
Raccah, B., 1102
radish, crown gall of, epidemiology, 1328
Ralston, J., (629)
Ramsdell, D. C., 350
Ramularia areola, on cotton, resistance to, 1007, **1008**
Randall, H., 206
Rao, D. V., (594)
Rathaiah, Y., 737, 1007
Reddy, O. R., 906
Rehder, D., (208)
Reil, W. O., (1457)
resistance
alfalfa to Phytophthora root rot, 81
apple to Erwinia amylovora in terminal shoots, 1439
Avena sterilis to slow stem rust, 74
barley
to powdery mildew, localization of, 901
to scald
race composition and frequency of pathogen, 726
race differentiation in California, 719
to smut, genetic basis for, 1342
bean to Rhizoctonia solani, seed coat factors, 342
corn
to Bipolaris maydis, effect of C and S cytoplasms, 336
to Colletotrichum graminicola, 86, **87**
cotton to Ramularia areola, 1007
elm to Ceratocystis ulmi, 1107
flax to rust, analysis of, 661
hardwoods to soft rot, brown rot, and white rot fungi, 15 spp., 1010
orchardgrass to rust, single-plant basis, 1445
peach to Cytospora cincta and Agrobacterium tumefaciens, reciprocal, 212
plants to rust, letter to editor, 935
potato to late blight, effect of R-3 gene, 964
reed canarygrass to noninfecting fungi, 498, 503
slash pine to Cronartium fusiforme, 511, 1229
sugar beet
to black root rot, diffusive, 277
to Rhizoctonia solani, screening method for, 1373
sweet potato to Fusarium wilt, 489
tobacco to black shank, tissue culture test, 91, **92**
tobacco seedlings to Phytophthora parasitica, screening method, 70
wheat
to rust, with rye genes, 664, **665**
to Septoria tritici, tolerance, 485
Rhizobium spp., on legumes, interaction with nematodes, 851, **852-854**
japonicum, in soybean, cytoplasmic changes in nodule formation, 1065, **1068-1071**
leguminosarum, on pea, Acrobeloides buetschlii interaction on, 468, **471**
meliloti, on alfalfa, interaction with Phytophthora megasperma, 1413, **1414**
Rhizoctonia
bataticola (see **Macrophomina** phaseolina)

solani
on bean, resistance associated with seed coat factors, 342
on cotton
growth and yield effects, 111
localization of peroxidase in seedlings of, 1072, **1073**
heterokaryosis in, role of H locus, 1348
Rhizobium japonicum, interaction on nitrogen fixing and soybean yield, 464
in soil, dinitroaniline herbicide effect on, 517
in spinach, etiology and control, 1267
in sugar beet cultivars, laboratory screening method, 1373
Rhizoglyphus echinopus, Verticillium albo-atrum in, passage through alimentary tract of, 46
Rhizopus stolonifer
on peach, postharvest control by cooling and fungicides, 801
on sweet potato, ipomeamarone stimulated by, 678
Rhopalosiphum spp., barley yellow dwarf virus vector, increased dosage effect, 646
maidis and padi, maize dwarf mosaic virus strains transmitted by, 332
Rhynchosporium secalis
on barley
race composition and frequency, 726
races in California, 719
Ribeiro, O. K., 172
rice
Aspergillus parasiticus on, relative humidity affecting, 104
Piricularia oryzae on, control with systemic tricyclazole, 1135
Sclerotium oryzae on, vertical distribution and survival of, 97
stem rot of, evaluation of virulence in, 1151
Xanthomonas oryzae on, pathogenic variability of, resistance to, 906
rice dwarf virus, purification of, use of polyethylene glycol precipitation, 1470

ipomoea, on sweet potato, ipomeamarone not stimulated by, 678
scabies
on potato
fertilizer effect on, 1236
fungicides and irrigation treatment for, 228
sugarbeet
Aphanomyces cochlioides on, cultivars resistant to, 277
Cercospora beticola on
benomyl resistance to, in Greece, 1452
race identification and distribution, 1158
susceptibility related to stomatal condition, 737, **739, 740**
Fusarium oxysporum on, 542
Fusarium oxysporum betae on
new weed hosts for, 822, **823**
seed of, 868, **869**
Pythium ultimum on, stimulation by chitin, 312
Rhizoctonia solani on, screening method for resistance, 1373
sugarcane, Helminthosporium sacchari on, toxins from isolates compared, 423
Sumner, D. R., 1267
sunflower
Pratylenchus penetrans in roots of, reduced electrical resistance of, 1262
Pratylenchus penetrans on, leaf diffusive resistance in, 967
Sutton, T. B., 453, 1313
sweet cherry, Phytophthora spp. of, cause of root and crown rot and feeder root necrosis, 549
sweet potato
chlorotic stunt and veinclearing viruses of, insect transmission of, in Nigeria, 642
Fusarium wilt resistance in, 489
hardcore, etiology and factors affecting, 582
storage roots of, outgrowth formation induced in, 28, **31, 32**
Sztejnberg, A., 74

Tainter, F. H., (1395)
Tattar, T. A., (967), (1262)
Taylor, G. A., (794)
Taylor, G. S., (70)
TeBeest, D. O., 1295
techniques
air spore sampler for, new 7-day sampler, 60
air spore sampling, three samplers compared, 62
barley inoculation with Ustilago hordei, partial vacuum method, 65
pycnidial density estimated on wheat leaves, TV scanning for, 11
single-plant basis for rating general resistance, 1445
Terry, E. R., (642)
Teviotdale, B. L., 295
Tewari, J. P., (1056)
thiazolyl-benzimidazole (see **fungicides**, specific)
Thielavia terrestris, 15 tree spp. susceptible to, 1010
Thielaviopsis basicola
in soil, selective media for, 526
on soybean, bioassay for root infection by, 811
thiophanate-methyl (see **fungicides**, specific)
Thompson, D. L., (635)
Thomson, S. V., 1198, 1457
Thongmeearkom, P., 322
Thouvenel, J. C., 954
Thuja plicata, decay from soft rot, brown rot, and white rot fungi, 1010
Thyr, B. D., 1116
Tigchelaar, E. C., (132)
Tilletia caries and controversa, on wheat, virulence genes and races, status, 657
Tingey, D. T., (1328)
tobacco
black shank of, oxamyl for control, 221
nematodes in roots of, interaction of two spp., 1427
Phytophthora parasitica nicotianae on
resistance to, in tissue culture, 91, **92**
seedlings screened for resistance to, 70

Pseudomonas spp., in leaves, incompatible, compatible, and saprophytic spp. compared, 754
tobacco etch virus, strain of, nonaphid transmission of, 652
tobacco mosaic virus
elimination from tobacco by plant regeneration from noninfected leaf tissue, 931
inhibition by actinomycin, thiouracil, and cycloheximide, 177
synthesis and spread in leaves, temperature effect, 625
in tobacco
peroxidase related to polyanion-induced interference, 1192
RNA synthesis in, 437
tobacco necrosis virus, dissociation by sodium dodecyl sulfate, 1302
tomato
Alternaria alternata on, host-specific toxin from, 165
Alternaria solani on, chlorothalonil residues protective against, 1018
corky stunt of, genetic disease, 132, **133**
Corynebacterium michiganense on, resistance genetics of, 1116
crown gall of, tumor penetration by hydrocarbons, 1460, **1461**
early blight of in seedlings of, soil fumigation effects, 1122
fruit chilling in, ultrastructural changes from, 617, **620-624**
Fusarium wilt in, independent of Meloidogyne infection, 1339
ozone response, potassium deficiency effect on, 734
Phytophthora infestans on, proteinase inhibitor activity increased in, 958
Pseudomonas solanacearum in soils of, persistence, 998
root pathogens controlled by solar heat under plastic mulch, 683
Sclerotium rolfsii on, control by fumigation, 910
Verticillium wilt of, effect of growth retardant Pydanon on, 1140
tomato aspermy virus, dissociation by sodium dodecyl sulfate, 1302
tomato bushy stunt virus, dissociation by sodium dodecyl sulfate, 1302
tomato ringspot virus, in Pelargonium hortorum, histopathology of, 844, **846-848**
Tomiyama, K., (1186)
Townsend, A. M., (225), (239), 1107
toxin (see also **phytoalexin**)
aflatoxin, in corn, 675
aflatoxin B_1, in corn, preharvest development of, 1120
from Alternaria alternata, host-specific on tomato, 165
in bean infected with Pseudomonas phaseolicola, 290
fungi on cottonseed and bolls, bioassay, 514
from Helminthosporium sacchari, geographic comparisons, 423
host-specific-, Erwinia amylovora on apple stems, 269
Tremaine, J. H., 34, (406), (1302)
tributyl [(5-chloro-2-thienyl)] methyl phosphonium chloride, Verticillium wilt of cotton reduced by, 106
Trichoderma harzianum, use in biocontrol of Phytophthora cinnamomi on pine, 1023
Trichodorus christiei, on spinach, root disease relation, 1267
tricyclazole (see **fungicides,** specific)
triforine (see **fungicides,** specific)
Triticum aestivum (see **wheat**)
Tsai, S. D., (106)
Tsugo heterophylla, decay from soft rot, brown rot, and white rot fungi, 1010
Tsuneda, A., 1056
Tu, J. C., 588, 1065
turfgrasses, systemic fungicide side effects on, in disease control, 806
turnip crinkle virus, dissociation by sodium dodecyl sulfate, 1302
turnip yellow mosaic virus, dissociation by sodium docecyl sulfate, 1302
Tylenchorhynchus
claytoni, on tobacco, interaction with Pratylenchus penetrans, 1427
dubius, in soil, effect of nitrogenous material and wetting agents on survival, 798
Typhula idahoensis
sexual incompatibility and virulence in, 1001
on winter wheat, organic residue effect on, 1028

Ulmus spp. (see **elm**)
ultrastructure (see also **electron microscopy**)
brown sapwood stain in ponderosa pine, 25, **26**
Cronartium fusiforme in slash pine, 741, **742, 743, 746, 747**
Helminthosporium maydis, conidium-conidiophore attachment, 1050, **1051**
on phloem necrosis of elm, histopathology, 598, **599, 600, 602-606**
Pyricularia grisea, nuclear behavior during mating, 122, **123, 124**
Sporobolus poiretii ovaries infected by Bipolaris ravenelii, 260, **265, 267**
tomato fruit chilling, 617, **620-624**
in white clover, clover yellow mosaic virus on, 588, **590-593**
Upper, C. D., (91)
Uriu, K., (1318)
Urocystis agropyri, on bluegrass, comparison with Ustilago striiformis, 1111
Uromyces phaseoli, appressorium formation in, contact stimulus in, 136, **139-143**
Ustilago
hordei
on barley
correlation of two measures of disease, 1342
partial-vacuum inoculation method, 65
striiformis, on bluegrass, comparison with Urocystis agropyri, 1111

Vaccinium corymbosum (see **blueberry**)
Valcic, A., (34)
Valsa spp., on peach, fungicides for, **1125**
leucostoma, conidia and ascospore dispersal in, 987, **988, 989**
Vance, C. P., 498, (503)
VanEtten, H. D., (1174)
Veech, J. A., 1072
Venturia inaequalis
ascospore discharge of, spore traps for monitoring, 453
conidial dispersal of, factors affecting, 1313
dodine tolerance in, 918
Verticillium
albo-atrum
on bulb mite, propagule passage through, 46, **47**
on cotton
control by growth retardant, 106
copper-induced fungistasis of microsclerotia of, 970

in pistachio, control in California, 1449, **1450**
in soil, survival in roots and residues, 883
survival in soil, crop rotation effect, 978
dahliae
in cotton and tomato, growth retardant effect on, 1140, **1141**
microsclerotia of, quantitative determination in soil, 1252
in soil, control by solar heat under polyethylene mulch, 683
on vegetable seedlings, dinitroaniline herbicide effect on, 517
malthousei, benomyl resistance in, acid production related to, 1144
Vicia faba, pea early-browning virus on, in Morocco, properties of, 1391, **1393**
Vigna spp. (see **cowpea**)
viruses (see also under specific virus names)
assay by serologically specific electron microscopy, 815
bark- and wood-grooving disease of peach and nectarine, graft-transmissible agent, 729, **730**
isometric-, sodium dodecyl sulfate effect on 22 viruses, 1302
mushroom, purification and antiserum production in particle of, 1260
viral cross protection, understanding needed, letter to editor, 382

Wagener, R. E., (514)
Waggoner, P. E., 786
Wahl, I., (74)
Walkinshaw, C. H., (511)

No. 1 — JANUARY

AWARDS AND AUTHOR'S GUIDE

1 Fellows of The American Phytopathological Society
6 Ruth Allen Award
7 CIBA-GEIGY Award
8 Author's Guide

DISEASE DETECTION AND LOSSES

11 A quantitative method for estimating density of Septoria tritici pycnidia on wheat leaves ..... Z. Eyal and M. B. Brown

ETIOLOGY

15 Identification of the races of Fusarium oxysporum f. sp. melonis causing wilt of muskmelon in California ..... J. V. Leary and W. D. Wilbur

17 Etiology of almond leaf scorch disease and transmission of the causal agent ..... S. M. Mircetich, S. K. Lowe, W. J. Moller, and G. Nylund

25 Brown sapwood stain of ponderosa pine caused by Cytospora sp.: cultural and histological aspects ..... J. D. Rogers and A. F. Noskowiak

28 Induction of outgrowth formation on storage roots of sweet potato due to plant pathogenic bacteria ..... M. Goto and T. Makino

34 Aggregation properties of carnation ringspot virus ..... J. H. Tremaine, W. P. Ronald, and A. Valcic

PHYSIOLOGY AND BIOCHEMISTRY

40 Multiple forms of endo-pectate lyase formed in culture and in infected squash hypocotyls by Hypomyces solani f. sp. cucurbitae ..... J. G. Hancock

ECOLOGY AND EPIDEMIOLOGY

46 Passage of Verticillium albo-atrum propagules through the alimentary canal of the bulb mite ..... D. W. Price

51 Biology of conidia, ascospores, and microsclerotia of Calonectria crotalariae in soil ..... S. C. Hwang and W. H. Ko

55 Application of two epidemiological models for the identification of slow stem rusting in wheat ..... D. R. MacKenzie

60 A new 7-day spore sampler ..... C. L. Kramer, M. G. Eversmeyer, and T. I. Collins

62 Three suction-type spore samplers compared ..... M. G. Eversmeyer, C. L. Kramer, and T. I. Collins

RESISTANCE

65 Estimating the efficiency of partial-vacuum inoculation of barley with Ustilago hordei ..... J. V. Groth and C. O. Person

70 Screening tobacco seedlings for resistance to Phytophthora parasitica var. nicotianae ..... J. L. McIntyre and G. S. Taylor

74 Mechanisms and stability of slow stem rusting resistance in Avena sterilis ..... A. Sztejnberg and I. Wahl

81 **Interrelationships of seedling age, inoculum, soil moisture level, temperature, and host and pathogen genotype in Phytophthora root rot of alfalfa** ..... R. G. Pratt and J. E. Mitchell

86 **Criteria for evaluation of resistance to maize anthracnose** ..... R. L. Nicholson and H. L. Warren

91 **A dominant gene conferring disease resistance to tobacco plants is expressed in tissue cultures** ..... J. P. Helgeson, G. T. Haberlach, and C. D. Upper

DISEASE CONTROL AND PEST MANAGEMENT

97 **Vertical distribution and survival of Sclerotium oryzae under various tillage methods** ..... R. K. Webster, J. Bolstad, C. M. Wick, and D. H. Hall

102 **The effect of concentration, exposure time, and age of plant on uptake and translocation of two systemic fungicides in soybeans** ..... B. L. Kirkpatrick and J. B. Sinclair

106 **Reduction of the severity of Verticillium wilt of cotton by the growth retardant, tributyl [(5-chloro-2-thienyl)methyl] phosphonium chloride** ..... D. C. Erwin, S. D. Tsai, and R. A. Khan

No. 2 — FEBRUARY

DISEASE DETECTION AND LOSSES

111 **Effect of a seedling disease caused by Rhizoctonia solani on subsequent growth and yield of cotton** ..... E. A. Brown and S. M. McCarter

ETIOLOGY

116 **Association of Phytophthora cinnamomi with ohia decline on the island of Hawaii** ..... J. T. Kliejunas and W. H. Ko

122 **Perithecial development and nuclear behavior in Pyricularia** ..... H. Yaegashi and T. T. Hebert

127 **Identification of Pythium ultimum in the collar rot of apple** ..... A. Bielenin, Z. Borecki, and D. F. Millikan

130 **Stimulating effects of transplanting on the development of wheat spindle streak mosaic virus in wheat plants infected from soil** ..... J. T. Slykhuis

132 **Corky stunt: a genetic disease of tomato** ..... W. R. Stevenson, E. C. Tigchelaar, and A. O. Jackson

CYTOLOGY AND HISTOLOGY

136 **Appressorium formation over stomates by the bean rust fungus: response to a surface contact stimulus** ..... W. K. Wynn

147 **The ultrastructure of the almond leaf scorch bacterium with special reference to topography of the cell wall** ..... S. K. Lowe, G. Nyland, and S. M. Mircetich

PHYSIOLOGY AND BIOCHEMISTRY

152 **Mechanism of tolerance of Pythium species to ethazol** ..... P. M. Halos and O. C. Huisman

158 **Inhibition of respiration in Pythium species by ethazol** ..... P. M. Halos and O. C. Huisman

165 **Production and nature of a host-specific toxin from Alternaria alternata f. sp. lycopersici** ..... D. G. Gilchrist and R. G. Grogan

172 **Cytochromes in the mycelium and oospores of Phytophthora capsici** ..... O. K. Ribeiro, G. A. Zentmyer, and D. C. Erwin

175 **Capsidiol production in pepper leaves in incompatible interactions with fungi** ..... E. W. B. Ward

177 **The sequence of inhibition of tobacco mosaic virus synthesis by actinomycin-D, 2-thiouracil, and cycloheximide in a synchronous infection** ..... W. O. Dawson and D. E. Schlegel

ECOLOGY AND EPIDEMIOLOGY

182 **Carbohydrate exudation from pea seeds: effect of cultivar, seed age, seed color, and temperature** ..... G. E. Short and M. L. Lacy

188 **Factors affecting pea seed and seedling rot in soil** ..... G. E. Short and M. L. Lacy

193 **Growth of cereal root-rot fungi as affected by temperature-water potential interactions** ..... R. J. Cook and A. A. Christen

198 **Meteorological conditions associated with long-distance dissemination and deposition of Puccinia graminis tritici uredospores in India** ..... S. Nagarajan, H. Singh, L. M. Joshi, and E. E. Saari

204 **Relation of relative humidity to the invasion of rough rice by Aspergillus parasiticus** ..... C. M. Christensen and C. J. Mirocha

RESISTANCE

206 **Effect of inoculation date on induction of resistance to Cytospora in Italian prune trees by Cytospora cincta** ..... H. Randall and A. W. Helton

208 **Rust resistance of wild Helianthus species of the north central United States** ..... D. E. Zimmer and D. Rehder

212 **Induction of reciprocal resistance in Prunus persica by Cytospora cincta and Agrobacterium tumefaciens** ..... A. W. Helton

215 **New hosts of St. Augustine decline virus** ..... N. Abu-Samah, and G. E. Holcomb

GENETICS

217 **Induced sectoring in diploid Aspergillus nidulans as a criterion of fungitoxicity by interference with hereditary processes** ..... S. G. Georgopoulos, A. Kappas, and A. C. Hasti

DISEASE CONTROL AND PEST MANAGEMENT

221 **Oxamyl-treated soil protects tobacco against black shank** ..... P. M. Miller and J. L. McIntyre

225 **Naturally occurring tolerance in isolates of Ceratocystis ulmi to methyl 2-benzimidazole-carbamate hydrochloride** ..... L. R. Schreiber and A. M. Townsend

228 **Influence of soil moisture and fungicide treatments on common scab and mineral content of potatoes** ..... J. R. Davis, G. M. McMaster, R. G. Callihan, F. H. Nissley, and J. J. Pavek

TECHNIQUES

234 **Development of a medium for the selective isolation of Sclerotium rolfsii** ..... P. A. Backman and R. Rodriguez-Kabana

No. 3 — MARCH

237 **Charlotte Elliott, 1883-1974** ..... A. L. Robert and J. G. Moseman

238 **Frederick Adolph Wolf, 1885-1975** ..... F. T. Wolf

ETIOLOGY

239 **Variability in aggressiveness, recovery, and cultural characteristics of isolates of Ceratocystis ulmi** ..... L. R. Schreiber and A. M. Townsend

245 **A variety of Collecephalus hemerocalli pathogenic on Hemerocallis** ..... J. N. Lunsford and J. A. Spencer

249 **Pseudomonas syringae: rough colony type mutants and filamentous cells** ..... J. D. Otta

253 **Cucumber mosaic virus in weed hosts near commercial fields of lettuce and celery** ..... W. L. Bruckart and J. W. Lorbeer

CYTOLOGY AND HISTOLOGY

260 **Ovarian infection of Sporobolus poiretii by Bipolaris ravenelii** ..... E. S. Luttrell

269 **Ultrastructural modifications in apple stems induced by Erwinia amylovora and the fire blight toxin** ..... P. Huang and R. N. Goodman

PHYSIOLOGY AND BIOCHEMISTRY

277 **Diffusive resistances of two sugarbeet cultivars in relation to their black root disease reaction** ..... G. R. Safir and C. L. Schneider

281 **Enzymatic maceration of plant tissues by endo-pectin lyase and endo-polygalacturonase from Aspergillus japonicus** ..... S. Ishii

290 **Bacterial growth, toxin production, and levels of ornithine carbamoyltransferase in resistant and susceptible cultivars of bean inoculated with Pseudomonas phaseolicola** ..... S. S. Gnanamanickam and S. S. Patil

ECOLOGY AND EPIDEMIOLOGY

295 **Factors affecting inoculum development and seed transmission of Helminthosporium gramineum** ..... B. L. Teviotdale and D. H. Hall

302 **Phytophthora citrophthora on Pieris japonica: infection, sporulation, and dissemination** ..... W. W. P. Gerlach, H. A. J. Hoitink, and A. F. Schmitthenner

309 **Survival and host range of Phytophthora citrophthora in Ohio nurseries** ..... W. W. P. Gerlach, H. A. J. Hoitink, and A. F. Schmitthenner

312 **Components in unbleached commercial chitin stimulate Pythium ultimum in sugarbeet spermosphere** ..... D. Gindrat

317 **Erwinia amylovora on fire blight canker surfaces and blossoms in relation to disease occurrence** ..... S. V. Beer and D. C. Opgenorth

323 **Epidemiology of pink disease of pineapple fruit** ..... R. B. Hine

VECTOR RELATIONS

328 **Association of Fusarium species with picnic beetles on corn ears** ..... C. E. Windels, M. B. Windels, and T. Kommedahl

332 **Aphid transmission of maize dwarf mosaic virus strains** ..... P. Thongmeearkon, R. E. Ford, and H. Jedlinski

RESISTANCE

336 **The effect of C and S group cytoplasms on resistance to southern corn leaf blight** ..... A. J. Julis, K. J. Leonard, and R. H. Moll

342 **Association of seed coat factors with resistance to Rhizoctonia solani in Phaseolus vulgaris** ..... K. Prasad and J. L. Weigle

346 **Resistance to wheat streak mosaic virus and its vector Aceria tulipae** ..... T. J. Martin, T. L. Harvey, and R. W. Livers

DISEASE CONTROL AND PEST MANAGEMENT

350 **Interaction of eradicant and protectant treatments upon the epidemiology and control of mummy berry disease of highbush blueberry** ..... D. C. Ramsdell, J. W. Nelson, and R. L. Myers

355 **Effect of soil fungicides on Macrophomina phaseolina sclerotium viability in soil and in soybean stem pieces** ..... M. B. Ilyas, M. A. Ellis, and J. B. Sinclair

TECHNIQUES

360 **An inoculation apparatus for evaluation of Bipolaris sorokiniana lesion development on progressively older leaves of Poa pratensis** ..... P. W. Robinson and C. F. Hodges

363 **Effect of agar on inhibition of spore germination by chemicals** ..... W. H. Ko, J. T. Kliejunas, and J. T. Shimooka

367 **Isolation of soft-rot Erwinia spp. from agricultural soils using an enrichment technique** ..... J. C. Meneley and M. E. Stanghellini

377 **Concentration of wound tumor virus determined from absorbance of the RNA of virus collected on filters** ..... I. Kimura and L. M. Black

No. 4 — APRIL

379 **Henry W. Thurston, Jr., 1893-1974** ..... J. R. Bloom and W. A. Chandler

380 **Harvey Earl Thomas, 1890-1974** ..... S. Wilhelm, M. W. Gardner, and R. D. Raabe

381 **Knud George Swenson, 1923-1975** ..... R. H. Converse

382 **Letter to the Editor**
Viral cross protection: more understanding is needed ..... M. Zaitlin

DISEASE DETECTION AND LOSSES

384 **Cercospora leaf spot of cowpea: models for estimating yield loss** ..... R. W. Schneider, R. J. Williams, and J. B. Sinclair

ETIOLOGY

389 **Pathogenicity and conditions for infection of chrysanthemum and rose flowers by Bipolaris (Helminthosporium) setariae** ..... A. W. Engelhard

392 **Field induction of pineapple interfruitlet corking, leathery pocket, and fruitlet core rot with Penicillium funiculosum** ..... K. G. Rohrbach and J. B. Pfeiffer

396 **Interaction of four bacteria causing pink disease of pineapple with several pineapple cultivars** ..... K. G. Rohrbach and J. B. Pfeiffer

400 **Stable L-phase of Erwinia carotovora induced by ultraviolet irradiation** ..... E. Cabezas de Herrera, M. Rubio Huertos, and O. Garcia Jurado

406 **Multiplication, purification, and properties of ryegrass mosaic virus** ..... Y. C. Paliwal and J. H. Tremaine

415 **Serological properties of oat necrotic mottle virus** ..... C. C. Gill

CYTOLOGY AND HISTOLOGY

419 **Ultrastructural examination of the Puccinia graminis- Darluca filum host-parasite relationship** ..... D. E. Carling, M. F. Brown, and D. F. Millikan

PHYSIOLOGY AND BIOCHEMISTRY

423 **Comparison and characterization of toxin produced by Helminthosporium sacchari from Australia, Florida, and Hawaii** ..... G. W Steiner and R. S. Byther

426 **Association of the phytoalexin kievitone with single-gene resistance of cowpeas to Phytophthora vignae** ..... J. E. Partridge and N. T. Keen

430 **Bacteriocin production by Corynebacterium michiganense** ..... E. Echandi

433 **Absence of cell wall polysaccharide degradation by Erwinia amylovora** ..... E. A. Seemüller and S. V. Beer

437 **Time-course of tobacco mosaic virus-induced RNA synthesis in synchronously infected tobacco leaves** ..... W. O. Dawson and D. E. Schlegel

ECOLOGY AND EPIDEMIOLOGY

443 **Factors affecting oospore germination in Phytophthora cactorum, the incitant of apple collar rot** ..... Z. Banihashemi and J. E. Mitchell

449 **Water potential of ergot honeydew and its influence upon colonization by microorganisms** ..... B. M. Cunfer

453 **Evaluation of four spore traps for monitoring discharge of ascospores of Venturia inaequalis** ..... T. B. Sutton and A. L. Jones

457 **Dispersal of Phytophthora cinnamomi on the island of Hawaii** ..... J. T. Kliejunas and W. H. Ko

461 **The effects of temperature and dew period on germination and infection by uredospores of Phakopsora pachyrhizi** ..... M. A. Marchetti, J. S. Melching, and K. R. Bromfield

464 **Rhizoctonia-Rhizobium interactions in relation to yield parameters of soybean** ..... R. G. Orellana, R. Sloger, and V. L. Miller

468 **Interaction of Acrobeloides buetschlii and Rhizobium leguminosarum on Wando pea** ..... S. W. Westcott and K. R. Barker

VECTOR RELATIONS

473 **Aphid transmission of peanut mottle virus** ..... O. R. Paguio and C. W. Kuhn

GENETICS

477 **Genetical studies with interspecific crosses between Phytophthora cinnamomi and Phytophthora parasitica** ..... B. Boccas and G. A. Zentmyer

RESISTANCE

485 **Evaluation of tolerance to Septoria leaf blotch in spring wheat** ..... O. Ziv and Z. Eyal

489 **Fusarium wilt resistance in sweet potatoes** ..... W. W. Collins and L. W. Nielsen

494 **Evaluation of the concept of horizontal resistance in the barley/Puccinia hordei host-pathogen relationship** ..... J. E. Parlevliet

498 **Cycloheximide treatments implicate papilla formation in resistance of reed canarygrass to fungi** ..... C. P. Vance and R. T. Sherwood

503 **Histochemistry of papillae formed in reed canarygrass leaves in response to noninfecting pathogenic fungi** ..... R. T. Sherwood and C. P. Vance

511 **Increase in virulence of Cronartium fusiforme on resistant slash pine** ..... G. A. Snow, R. J. Dinus, and C. H. Walkinshaw

POST-HARVEST PATHOLOGY AND MYCOTOXINS

514 **Toxigenic fungi from cotton** ..... U. L. Diener, R. E. Wegener, G. Morgan-Jones, and N. D. Davis

DISEASE CONTROL AND PEST MANAGEMENT

517 **Effect of dinitroaniline herbicides on plant resistance to soilborne pathogens** ..... A. Grinstein, J. Katan, and Y. Eshel

TECHNIQUES

523 **The preparation and use of a fluorescent antibody reagent for the detection of Pythium graminicola** ..... D. G. White

526 **Improved selective media for estimating populations of Thielaviopsis basicola in soil on dilution plates** ..... J. N. C. Maduewesi, B. Sneh, and J. L. Lockwood

531 **A fixation method for demonstrating mycoplasmalike organisms in plants** ..... L. D. Smith, J. L. Dale, and K. S. Kim

534 **Storage of preparations of barley yellow dwarf virus** ..... W. F. Rochow, J. W. Blizzard, I. Muller, and H. E. Waterworth

No. 5 — MAY

537 **Letter to the Editor: Conidial release in Helminthosporium** ..... D. E. Aylor and P. R. Day

ETIOLOGY

538 **Occurrence and interaction of three species of Colletotrichum on alfalfa in the mid-Atlantic United States** ..... J. H. Graham, T. E. Devine, and C. H. Hanson

542 **Common hosts for Fusarium oxysporum formae speciales spinaciae and betae** ..... G. M. Armstrong and J. K. Armstrong

546 **Phytophthora capsici, corrected name for the cause of Phytophthora blight of macadamia racemes** ..... R. K. Kunimoto, M. Aragaki, J. E. Hunter, and W. H. Ko

549 **Phytophthora root and crown rot of cherry trees** ..... S. M. Mircetich and M. E. Matheron

559 **Microorganisms isolated from wounds inflicted on red maple, paper birch, American beech, and red oak in winter, summer, and autumn** ..... A. L. Shigo

564 **Association of bacterialike organisms with a new potato disease** ..... M. Klein, S. Zimmerman-Gries, and B. Sneh

570 **Purification and properties of hibiscus chlorotic ringspot virus** ..... H. E. Waterworth, R. H. Lawson, and R. L. Monroe

576 **Characterization of potato virus Y strains isolated from pepper** ..... K. M. Makkouk and D. J. Gumpf

582 **Hardcore development in sweetpotatoes a response to chilling and its remission as influenced by cultivar. curing temperatures, and time of duration of chilling** ..... R. H. Daines, D. F. Hammond, N. F. Haard, and M. J. Ceponis

CYTOLOGY AND HISTOLOGY

588 **Lysosomal distribution and acid phosphatase activity in white clover infected with clover yellow mosaic virus** ..... J. C. Tu

594 **Occurrence of clover yellow mosaic virus aggregates in transfer cells of Pisum sativum** ..... C. Hiruki, P. Shukla, and D. V. Rao

598 **Histopathology of phloem necrosis in Ulmus americana** ..... E. J. Braun and W. A. Sinclair

608 **Morphology of filamentous forms of a mycoplasmalike organism associated with hydrangea virescence** .. S. S. Hearon, R. H. Lawson, F. F. Smith, J. T. McKenzie, and J. Rosen

617 **Ultrastructural changes associated with chilling of tomato fruit** ..... H. D. Moline

PHYSIOLOGY AND BIOCHEMISTRY

625 **Enhancement of tobacco mosaic virus spread in mechanically inoculated leaves by pre-incubation at a nonpermissive temperature** ..... W. O. Dawson and D. E. Schlegel

629 **Sodium azide-induced mutants of peas that accumulate pisatin** ..... L. A. Hadwiger, C. Sander, J. Eddyvean, and J. Ralston

ECOLOGY AND EPIDEMIOLOGY

631 **Effects of temperature and soil water potential on expression of barley stripe incited by Helminthosporium gramineum** ..... M. N. Prasad, K. J. Leonard, and C. F. Murphy

635 **Effects of temperature and host maturity on lesion development of Colletotrichum graminicola on corn** ..... K. J. Leonard and D. L. Thompson

640 **Survival of Colletotrichum coccodes in soil** ..... J. D. Farley

VECTOR RELATIONS

642 **Insect transmission of sweet potato disease agents in Nigeria** ..... G. A. Schaefers and E. R. Terry

646 **The response of cereals to increased dosage with barley yellow dwarf virus** ..... P. A. Burnett and C. C. Gill

652 **Aphid transmission of a nonaphid-transmissible strain of tobacco etch virus** ..... J. N. Simons

GENETICS

655 **Semi-incompatibility in Cochliobolus carbonum** ..... S. C. Dalmacio and R. R. Nelson

RESISTANCE

657 **Current status of virulence genes and pathogenic races of the wheat bunt fungi in the northwestern USA** ..... J. A. Hoffman and R. J. Metzger

661 **Genetics of rust resistance of six Argentinian flax introductions** ..... D. E. Zimmer and G. D. Statler

664 **Strains of Puccinia graminis virulent on wheat plants carrying gene Sr27 derived from Imperial rye** ..... N. H. Luig and I. A. Watson

667 **Development of Puccinia graminis f. sp. tritici on resistant and susceptible barley cultivars** ..... M. A. Sellam and R. D. Wilcoxson

POSTHARVEST PATHOLOGY AND MYCOTOXINS

669 **Conidiogenesis of Marssonina panattoniana and its potential as a serious postharvest pathogen of lettuce** ..... H. E. Moline and F. G. Pollack

675 **Aflatoxin production and fungal growth on single cross corn hybrids inoculated with Aspergillus flavus** ..... J. C. LaPrade and A. Manwiller

678 **Ipomeamarone content in diseased and nondiseased tissues of sweet potatoes infected with different pathogens** ..... W. J. Martin, V. C. Hasling, and E. A. Catalano

DISEASE CONTROL AND PEST MANAGEMENT

680 **Effect of benomyl field sprays on internally-borne fungi, germination, and emergence of late-harvested soybean seeds** ..... M. A. Ellis and J. B. Sinclair

683 **Solar heating by polyethylene mulching for the control of diseases caused by soil-borne pathogens** ..... J. Katan, A. Greenberger, H. Alon, and A. Grinstein

689 **Soil fumigation and peach rootstocks for protection against peach tree short life** ..... E. I. Zehr, R. W. Miller, and F. H. Smith

No. 6 — JUNE

DISEASE DETECTION AND LOSSES

695 **Representational errors due to interplot interference in field experiments with late blight of potato** ..... W. C. James, C. S. Shih, W. A. Hodgson, and L. C. Callbeck

ETIOLOGY

701 **Distribution of the A^1 mating type of Phytophthora cinnamomi** ..... G. A. Zentmyer

704 **Pathogenicity of Pythium myriotylum and other species of Pythium to caladium derived from shoot-tip culture** ..... W. H. Ridings and R. D. Hartman

710 **Identity and pathogenicity of species of Phytophthora causing root rot of Douglas-fir in the Pacific northwest** ..... R. G. Pratt, L. F. Roth, E. M. Hansen, and W. D. Ostrofsky

715 **Pathogenicity of different isolates of Stemphylium botryosum on alfalfa differentials** ..... O. L. Borges, E. H. Stanford, and R. K. Webster

717 **Arthroconidia formation in cultures of Marasmius perniciosus** ..... J. C. Delgado and A. A. Cook

719 **Race differentiation, distribution, and frequency of Rhynchosporium secalis in California** ..... L. F. Jackson and R. K. Webster

726 **The dynamics of a controlled population of Rhynchosporium secalis, changes in race composition and frequencies** ..... L. F. Jackson and R. K. Webster

729 **A graft-transmissible agent associated with bark- and wood-grooving disease of peach and nectarine** ..... D. A. Rosenberger and A. L. Jones

731 **Influence of benomyl soil treatment on pinto bean plants exposed to peroxyacetyl nitrate and ozone** ..... E. J. Pell

734 **Response of potassium-deficient tomato plants to atmospheric ozone** ..... I. A. Leone

CYTOLOGY AND HISTOLOGY

737 **Infection of sugarbeet by Cercospora beticola in relation to stomatal condition** ..... Y. Rathaiah

741 **Histopathology of one- and two-year-old resisted infections of Cronartium fusiforme in slash pine** ..... F. F. Jewell and D. C. Spiers

749 **The host-pathogen interaction of alfalfa and Stemphylium botryosum** ..... O. L. Borges, E. H. Stanford, and R. K. Webster

754 **Ultrastructural evidence for immobilization of an incompatible bacterium, Pseudomonas pisi, in tobacco leaf tissue** ..... R. N. Goodman, P-Y. Huang, and J. A. White

PHYSIOLOGY AND BIOCHEMISTRY

765 **Germination of coffee rust uredospores and their inhibition by cinnamic acid derivatives** ..... M. A. Stahmann, M. R. Musumeci, and W. B. C. Moraes

770 **Immunological comparison and characterization of ribosomes of Xanthomonas vesicatoria** ..... N. W. Schaad

ECOLOGY AND EPIDEMIOLOGY

777 **Production of microsclerotia by species of Cylindrocladium** ..... B. B. Hunter and H. L. Barnett

781 **Weather and epidemics of Septoria leaf blotch of wheat** ..... G. Shaner and R. E. Finney

786 **Germination of Alternaria solani spores in changing osmotic pressures** ..... P. E. Waggoner and J-Y. Parlange

RESISTANCE

790 **Protection of cucumber against Colletotrichum lagenarium and Cladosporium cucumerinum** ..... R. Hammerschmidt, S. Acres, and J. Kuć

794 **Incorporation of additive genes for stripe rust resistance in winter wheat** ..... E. L. Sharp, B. K. Sally, and G. A. Taylor

DISEASE CONTROL AND PEST MANAGEMENT

798 **Effects of some nitrogenous materials and wetting agents on survival in soil of lesion, stylet, and lance nematodes** ..... P. M. Miller

801 **Hydrocooling and hydraircooling with fungicides for reduction of postharvest decay of peaches** ..... J. M. Wells and A. H. Bennett

806 **Relation of dosage rates, nutrition, air temperature, and suscept genotype to side effects of systemic fungicides on turfgrasses** ..... B. G. Joyner and H. B. Couch

TECHNIQUES

811 Test tube method of bioassay for Thielaviopsis basicola root rot of soybean ..... J. N. C. Maduewesi and J. L. Lockwood

815 Assay for viruses and mycoplasmas using serologically specific electron microscopy ..... K. S. Derrick and R. H. Brlansky

No. 7 — JULY

821 John A. Milbrath—1909-1974 ..... H. R. Cameron and R. A. Young

ETIOLOGY

822 Evidence for an expanded host range of Fusarium oxysporum f. sp. betae ..... J. D. MacDonald and L. D. Leach

828 Pseudomonas aeruginosa: cause of internal brown rot of onion ..... E. J. Cother, B. Darbyshire, and J. Brewer

835 Purification, properties, and serology of carnation yellow fleck virus ..... M. Bar-Joseph and M. Smookler

CYTOLOGY AND HISTOLOGY

839 Histopathology of mimosa infected with Fusarium oxysporum f. sp. perniciosum ..... P. M. Phipps and R. J. Stipes

844 Histopathological examination of pelargonium infected with tomato ringspot virus ..... D. J. Murdock, P. E. Nelson, and S. H. Smith

851 Histopathology of nodular tissues of legumes infected with certain nematodes ..... K. R. Barker and R. S. Hussey

856 Histopathological characterization of ozone injury to soybean foliage ..... E. J. Pell and W. C. Weissberger

ECOLOGY AND EPIDEMIOLOGY

862 Determining inoculum potentials of Cylindrocladium floridanum in cropped and chemically-treated soils by a quantitative assay ..... J. A. Menge and D. W. French

868 The association of Fusarium oxysporum f. sp. betae with nonprocessed and processed sugarbeet seed ..... J. D. MacDonald and L. D. Leach

873 Ecological races of Helminthosporium maydis race T ..... J. P. Hill and R. R. Nelson

877 Movement of zoospores of Phytophthora cryptogea in soils of various textures and matric potentials ..... J. M. Duniway

883 Survival of Verticillium albo-atrum on nonsuscept roots and residues in field soil ..... D. M. Benson and L. J. Ashworth, Jr.

888 Simulation model for spread and intensification of western dwarf mistletoe in thinned stands of ponderosa pine saplings ..... M. A. Strand and L. F. Roth

VECTOR RELATIONS

896 Multiplication of the oat blue dwarf virus in the aster leafhopper ..... E. E. Banttari and R. J. Zeven

RESISTANCE

901 **Localization of induced resistance and susceptibility in barley leaves inoculated with the powdery mildew fungus** ..... S. Ouchi, H. Oku, and C. Hibino

906 **Pathogenic variability in Xanthomonas oryzae** ..... O. R. Reddy and S. H. Ou

DISEASE CONTROL AND PEST MANAGEMENT

910 **Efficacy of soil fumigants and methods of application for controlling southern blight of tomatoes grown for transplants** ..... S. M. McCarter, C. A. Jaworski, A. W. Johnson, and R. E. Williamson

914 **Evaluation of Cercospora rodmanii as biological control of waterhyacynths** ..... K. E. Conway

918 **Tolerance to dodine in Venturia inaequalis** ..... K. S. Yoder and E. J. Klos

924 **Injury of stone fruits by preharvest captan sprays followed by postharvest treatments** ..... G. A. Chastagner and J. M. Ogawa

928 **Leakage, infection, and emergence of injured seed** ..... W. E. McKeen and B. MacDonald

TECHNIQUES

931 **Regeneration of virus-free plants from dark-green islands of tobacco mosaic virus-infected tobacco leaves** ..... H. H. Murakishi and P. S. Carlson

No. 8 — AUGUST

933 **Harold Thurston Cook** ..... L. P. McCulloch and P. R. Miller

Letters to the Editor:

935 **Hypersensitivity, the cause or consequence of rust resistance** ..... M. C. Heath

937 **Multilines and "super races": a simple model** ..... J. V. Groth

940 **On the question of 'elicitors' or 'inducers' in incompatible interactions between plants and fungal pathogens** ..... E. W. B. Ward and A. Stoessl

DISEASE DETECTION AND LOSSES

942 **Leaf infection and yield loss caused by four Helminthorporium leaf diseases of corn** ..... D. E. Fisher, A. L. Hooker, S. M. Lim, and D. R. Smith

ETIOLOGY

945 **Fungal flora of crambe seeds and virulence of Alternaria brassicicola** ..... R. A. Kilpatrick

949 **Host range, purification, and properties of a flexuous rod-shaped virus isolated from carrot** ..... W. E. Howell and G. I. Mink

954 **Guinea grass mosaic virus, a new member of the potato virus Y group** ..... J. C. Thouvenel, L. Givord, P. Pfeiffer

PHYSIOLOGY AND BIOCHEMISTRY

958 **Increased proteinase inhibitor activity in response to infection of resistant tomato plants by Phytophthora infestans** ..... J. H. Peng and L. L. Black

964 **Effect of the R-3 gene in resistance of the Wauseon potato tuber to Pytophthora infestans** ..... R. M. Zacharius, S. F. Osman, E. G. Heisler, and J. C. Kissinger

967 **Leaf diffusive resistance of sunflowers infected by Pratylenchus penetrans** ..... D. T. Kaplan, R. A. Rohde, and T. A. Tattar

ECOLOGY AND EPIDEMIOLOGY

970 **Copper-induced fungistasis of microsclerotia of Verticillium albo-atrum and its influence on infection of cotton in the field** ..... L. J. Ashworth, Jr., O. C. Huisman, R. G. Grogan, and D. M. Harper

978 **Influence of crop rotation on survival of Verticillium albo-atrum in soils** ..... O. C. Huisman and L. J. Ashworth, Jr.

982 **Variability in growth of Phytophthora cinnamomi in relation to temperature** ..... G. A. Zentmyer, J. V. Leary, L. J. Klure, and G. L. Grantham

987 **Release and dispersal of conidia and ascospores of Valsa leucostoma** ..... P. F. Bertrand and H. English

992 **Pseudomonas lachrymans adsorption, survival and infectivity following precision inoculation of leaves** ..... J. H. Haas and J. Rotem

998 **Persistence of Pseudomonas solanacearum in artificially infested soils** ..... S. M. McCarter

GENETICS

1001 **Sexual incompatibility and virulence in Typhula idahoensis** ..... R. K. Kiyomoto and G. W. Bruehl

RESISTANCE

1007 **Reaction of cotton species and cultivars to four isolates of Ramularia areola** ..... Y. Rathaiah

1010 **Decay resistance and susceptibility of sapwood of fifteen tree species** ..... W. E. Eslyn and T. L. Highley

DISEASE CONTROL AND PEST MANAGEMENT

1018 **Chlorothalonil residues on field tomatoes and protection against Alternaria solani** ..... R. J. Lukens and S. H. Ou

1023 **Evaluation of Trichoderma harzianum-impregnated clay granules as a biocontrol for Phytophthora cinnamomi causing damping-off of pine seedlings** ..... W. D. Kelley

1028 **Effect of organic residues on snowmold of winter wheat** ..... D. M. Huber and G. R. Anderson

1033 **Control of Pythium blight on Penncross bentgrass with pyroxychlor** ..... P. L. Sanders, C. G. Warren, and H. Cole, Jr.

1038 **Uptake, translocation, and persistence of oxytetracycline in coconut palm** ..... R. E. McCoy

No. 9 — SEPTEMBER

1043 **Panos D. Caldis, 1896-1974** ..... L. O. Lawver

ETIOLOGY

1045 **Purple seed stain of soybeans** ..... K. W. Roy and T. S. Abney

CYTOLOGY AND HISTOLOGY

1050 **Ultrastructure and mechanics of the conidium-conidiophore attachment of Helminthosporium maydis** ..... J. R. Aist, D. E. Aylor, and J. Y. Parlange

1056 **Mode of parasitism of Alternaria brassicae by Nectria inventa** ..... A. Tsuneda, W. P. Skoropad, and J. P. Tewari

1065 **Cytoplasmic changes during and after infection of soybean root nodule cells with Rhizobia** ..... J. C. Tu

PHYSIOLOGY AND BIOCHEMISTRY

1072 **Localization of peroxidase in Rhizoctonia solani-infected cotton seedlings** ..... J. A. Veech

1077 **Evidence for a factor that stimulates tissue maceration by pectolytic enzymes** ..... S. Ishii and K. Kiho

ECOLOGY AND EPIDEMIOLOGY

1082 **Cochliobolus sativus conidia populations in soils following various cereal crops** ..... S. H. F. Chinn

1085 **Effect of plant residue amendments and chemical treatments upon the inoculum potential of Cylindrocladium floridanum in soil** ..... J. A. Menge and D. W. French

1090 **Distribution and pathogenicity of Fusarium oxysporum in a forest nursery soil** ..... W. J. Bloomberg

1093 **The effect of plant age on severity of pea wilt caused by Fusarium oxysporum f. sp. pisi race 5** ..... R. F. Nyvall and W. A. Haglund

1097 **Latent infections and seasonal variability of crown gall development in seedlings of three Prunus species** ..... L. W. Moore

VECTOR RELATIONS

1102 **Transmission of citrus tristeza virus by the melon aphid** ..... B. Raccah, G. Loebenstein, and M. Bar-Joseph

RESISTANCE

1105 **A proposed nomenclature of Fusarium oxysporum f. sp. melonis races and resistance genes in Cucumis melo** ..... G. Risser, Z. Banihashemi, and D. W. Davis

1107 **Resistance of hybrid elm progenies to Ceratocystis ulmi** ..... A. M. Townsend and L. R. Schreiber

1111 **Comparative primary infection characteristics of Ustilago striiformis and Urocystis agropyri on cultivars of Poa pratensis** ..... C. F. Hodges

1116 **Inheritance of resistance to Corynebacterium michiganense in tomato** ..... B. D. Thyr

POST-HARVEST PATHOLOGY AND MYCOTOXINS

1120 **Preharvest development of aflatoxin B_1 in corn in the United States** ..... M. S. Zuber, O. H. Calvert, E. B. Lillehoj, and W. F. Kwolek

DISEASE CONTROL AND PEST MANAGEMENT

1122 **Soil fumigation effects on early blight of tomato transplants** ..... S. M. McCarter, C. A. Jaworski, and A. W. Johnson

1125 **Protection of peach shoots against species of Leucostoma with benomyl and captafol** ..... J. Northover

1129 **Control of leaf rust on spring wheat by seed treatment with 4-N-butyl-1,2,4-triazole** ..... J. B. Rowell

1135 **Tricyclazole: A new systemic fungicide for control of Piricularia oryzae on rice** ..... J. D. Froyd, C. J. Paget, L. R. Guse, B. A. Dreikorn, and J. L. Pafford

1140 **Effect of the plant growth retardant Pydanon on Verticillium wilt of cotton and tomato** ..... H. Buchenauer and D. C. Erwin

1144 **Acid production, a possible basis for benomyl tolerance in Verticillium malthousei** ..... D. H. Lambert and P. J. Wuest

1148 **Field control of coconut lethal yellowing with oxytetracycline hydrochloride** ..... R. E. McCoy, V. J. Carroll, C. P. Poucher, and G. H. Gwin

TECHNIQUES

1151 **Evaluation of virulence in isolates of Sclerotium oryzae** ..... S. A. Ferreira and R. K. Webster

1154 **Erratum**

No. 10 — OCTOBER

1155 **A powdery mildew of chilli caused by Oidiopsis sp.** ..... C. H. Blazquez

1158 **Identification and distribution of races C_1 and C_2 of Cercospora beticola from sugarbeet** ..... E. D. Whitney and R. T. Lewellen

1161 **Colonization of aerial peanut pegs by Aspergillus flavus and A. niger-group fungi under field conditions** ..... G. J. Griffin and K. H. Garren

1163 **Evidence suggesting nonassociation of mycoplasma with pea disease** ..... R. O. Hampton, E. R. Florance, R. F. Whitcomb, and R. J. Seidler

CYTOLOGY AND HISTOLOGY

1169 **Suscept-pathogen relationship in maize affected by yellow leaf blight** ..... R. M. Jimenez-Diaz and C. W. Boothroyd

PHYSIOLOGY AND BIOCHEMISTRY

1174 **The relation between pisatin and the development of Aphanomyces euteiches in diseased Pisum sativum** ..... S. G. Pueppke and H. D. Van Etten

1186 **Accumulation and transformation of rishitin and lubimin in potato tuber tissue infected by an incompatible race of Phytophthora infestans** ..... T. Horikawa, K. Tomiyama, and N. Doke

1192 **Peroxidase activity in tobacco plants with polyanion-induced interference to tobacco mosaic virus** ..... A. Stein and G. Loebenstein

ECOLOGY AND EPIDEMIOLOGY

1195 **Occurrence of Darluca filum on Cronartium strobilinum and C. fusiforme infecting oak** ..... E. G. Kuhlman and F. R. Matthews

1198 **Mechanisms of survival of zoospores of Phytophthora parasitica in irrigation water** ..... S. V. Thomson and R. M. Allen

1203 **Ecology and epidemiology of Pythium species in field soil** ..... R. D. Lumsden, W. A. Ayers, P. B. Adams, R. L. Dow, J. A. Lewis, G. C. Papavizas, and J. G. Kantzes

1210 **Persistence and distribution of a clone of Armillaria mellea in a ponderosa pine forest** ..... C. G. Shaw III and L. F. Roth

1214 **Microbial antogonists of Bipolaris maydis** ..... J. P. Sleesman and C. Leben

1219 **Pseudomonas lachrymans inoculum on infected cucumber leaves subjected to dew- and rain-type wetting** ..... J. H. Haas and J. Rotem

1224 **Effect of soil microflora on the interaction of three plant-parasitic nematodes with celery** ..... J. L. Starr and W. F. Mai

RESISTANCE

1229 **Types of resistance and compatibility in slash pine seedlings infected by Cronartium fusiforme** ..... T. Miller, E. B. Cowling, H. R. Powers, Jr., and T. E. Blalock

DISEASE CONTROL AND PEST MANAGEMENT

1236 **Fertilizer effects on common scab of potato and the relation of calcium and phosphate-phosphorous** ..... J. R. Davis, R. E. McDole, and R. H. Callihan

1242 **The effects of particle size and distribution on performance of the fungicide chlorothalonil** ..... P. A. Backman, G. D. Munger, and A. F. Marks

1246 **Phenology and control of Endocronartium harknessii in Pennsylvania** ..... W. Merrill and B. R. Kistler

1249 **Dichloromethane: nonaqueous vehicle for systemic fungicides in soybean seeds** ..... M. A. Ellis, S. F. Foor, and J. B. Sinclair

TECHNIQUES

1252 **A cesium chloride flotation technique for the isolation of Verticillium dahliae microsclerotia from soil** ..... Y. Ben-Yephet and Y. Pinkas

1255 **An elutriation method for quantitative isolation of Cylindrocladium crotalariae microsclerotia from peanut field soil** ..... P. M. Phipps, M. K. Beute, and K. R. Barker

1260 **Partial purification and antiserum production to the 19 × 50-nm mushroom virus particle** ..... J. W. Moyer and S. H. Smith

1262 **Reduction of electrical resistance in sunflower roots infected with lesion nematodes** ..... D. T. Kaplan, T. A. Tattar, and R. A. Rohde

1264 **Errata**

No. 11 — NOVEMBER

Letter to the Editor:

1265 **Further comments on spore release by Drechslera (Helminthosporium) spp. and other fungi** ..... C. M. Leach

ETIOLOGY

1267 **Etiology and control of root diseases of spinach** ..... D. R. Sumner, S. J. Kays, and A. W. Johnson

1274 **Seed transmission of bean common mosaic virus in phasemy bean** ..... R. Provvidenti and S. W. Braverman

1276 **Effects of Pratylenchus vulnus on the gnotobiotic growth of Myrobalan plum seedlings** ..... E. H. Moody and B. F. Lownsbery

CYTOLOGY AND HISTOLOGY

1279 **Comparative histology of Botrytis squamosa and B. cinerea on onion leaves** ..... C. A. Clark and J. W. Lorbeer

1290 **Histology of the suscept-pathogen relationship between Glycine max and Phakopsora pachyrhizi, the cause of soybean rust** ..... M. R. Bonde, J. S. Melching, and K. R. Bromfield

PHYSIOLOGY AND BIOCHEMISTRY

1295 **Stomatal resistance of red oak seedlings infected by Ceratocystis fagacearum** ..... D. O. TeBeest, R. D. Durbin, and J. E. Kuntz

1298 **Synthesis and movement of southern bean mosaic virus in cowpea hosts with virus-induced necrotic local lesions** ..... C. W. Kuhn and D. B. Adams

1302 **Comparison of the effects of sodium dodecyl sulfate on some isometric viruses** ..... W. P. Ronald and J. H. Tremaine

ECOLOGY AND EPIDEMIOLOGY

1310 **Distribution of Mycosphaerella ligulicola and selection for environmental races** ..... R. E. McCoy and J. P. Blakeman

1313 **Factors affecting dispersal of conidia of the apple scab fungus** ..... T. B. Sutton, A. L. Jones, and L. A. Nelson

1318 **Late season water deficits and development of Cytospora canker on French prune** ..... P. F. Bertrand, H. English, K. Uriu, and F. J. Schick

1321 **Relation of soil physical and fertility properties to the occurrence of Cytospora canker in French prune orchards** ..... P. F. Bertrand, H. English, and R. M. Carlson

1325 **Infectivity and survival of soft-rot bacteria in Chinese cabbage** ..... T. W. Mew, W. C. Ho, and L. Chu

1328 **Effect of temperature, plant age, and infection site on the severity of crown gall disease in radish** ..... L. W. Moore and D. T. Tingey

1334 **Bacterial desiccation: effects of temperature, relative humidity, and culture age on survival** ..... J. P. Sleesman and C. Leben

1339 **Failure of root-knot nematode to affect Fusarium wilt resistance in tomato** ..... J. P. Jones, A. J. Overman, and P. Crill

GENETICS

1342 **Relation between two measures of disease expression in barley-Ustilago hordei interactions** ..... J. V. Groth, C. O. Person, and T. Ebba

1348 **The role of the H-locus in heterokaryosis in Rhizoctonia solani** ..... J. E. Puhalla and W. W. Carter

1354 **Genetic inhibition of ascus formation in Cochliobolus carbonum** ..... S. C. Dalmacio and R. R. Nelson

RESISTANCE

1356 **Three components of slow leaf-rusting at different growth stages in wheat** ..... H. W. Ohm and G. E. Shaner

1361 **New races 5 and 6 of Phytophthora megasperma var. sojae and differential reactions of soybean cultivars for races 1 and 6** ..... J. H. Haas and R. I. Buzzell

DISEASE CONTROL AND PEST MANAGEMENT

1363 **Effect of heating or drying on Armillaria mellea or Trichoderma viride and the relation to survival of A. mellea in soil** ..... D. E. Munnecke, W. Wilbur, and E. F. Darley

1369 **Survival of some plant pathogens during composting of hardwood tree bark** ..... H. A. J. Hoitink, L. J. Herr, and A. F. Schmitthenner

TECHNIQUES

1373 **Rapid laboratory screening of sugarbeet cultivars for resistance to Rhizoctonia solani** ..... C. L. Campbell and J. Altman

1374 **Errata**

No. 12 — DECEMBER

DISEASE DETECTION AND LOSSES

1375 **Multiple regression accounting for wheat yield reduction by Septoria nodorum and other pathogens** ..... L. R. Nelson, M. R. Holmes, and B. M. Cunfer

ETIOLOGY

1380 **Comparative pathogenicity of Pythium myriotylum and P. irregulare to the soybean cultivar Bragg** ..... J. W. Southern, N. C. Schenck, and D. J. Mitchell

1386 **Susceptibility of pineapple cultivars to fruit diseases incited by Penicillium funiculosum and Fusarium moniliforme** ..... K. G. Rohrbach and J. B. Pfeiffer

1391 **Some properties of an isolate of pea early-browning virus occurring in Morocco** ..... B. E. L. Lockhart and H. U. Fischer

PHYSIOLOGY AND BIOCHEMISTRY

1395 **Germination self-inhibitor from Cronartium commandrae aeciospores** ..... D. A. Eppstein and F. H. Tainter

1398 **The effect of osmotic potential and specific ions on growth of Phytophthora cinnamomi** ..... R. E. Sterne, G. A. Zentmyer, and F. T. Bingham

1403 **Leakage of electrolytes and phenols from apple leaves exposed to virulent and avirulent strains of Erwinia amylovora** ..... S. K. Addy

ECOLOGY AND EPIDEMIOLOGY

1406 **Epiphytology of Puccinia striiformis at five selected locations in Oregon during 1968 and 1969** ..... R. G. Emge and R. D. Shrum

1413 **Development of Phytophthora root rot of alfalfa in the field and the association of Rhizobium nodules with early root infections** ..... F. A. Gray and R. B. Hine

1418 **The influence of osmotic water potential on the linear growth of Endothia species** ..... P. P. Hunter, G. J. Griffin, and R. J. Stipes

1422 **Concentration and infectivity of barley stripe mosaic virus in barley** ..... M. K. Palomar and M. K. Brakke

1427 **Competitive interaction of Tylenchorhynchus claytoni and Pratylenchus penetrans in tobacco roots** ..... J. L. McIntyre and P. M. Miller

VECTOR RELATIONS

1431 **Isolation of Cryptoporus volvatus and Fomes pinicola from Dendroctonus pseudotsugae** ..... J. D. Castello, C. G. Shaw, and M. M. Furniss

GENETICS

1435 **Differences between compatible parasite/host genotypes involving the Pm4 locus of wheat and the corresponding genes in Erysiphe graminis f. sp. tritici** ..... T. J. Martin and A. H. Ellingboe

RESISTANCE

1439 **Reaction of terminal shoots of apple cultivars to invasion by Erwinia amylovora** ..... H. S. Aldwinckle and J. L. Preczewski

1445 **Rating general resistance on a single-plant basis** ..... W. Q. Loegering, D. A. Sleper, J. M. Johnson, and K. H. Asay

DISEASE CONTROL AND PEST MANAGEMENT

1449 **Verticillium wilt of the pistachio nut tree: occurrence in California and control by soil fumigation** ..... L. J. Ashworth, Jr. and G. Zimmerman

1452 **The adaptability of the benomyl-resistant population of Cercospora beticola in northern Greece** ..... G. Dovas, G. Skylakakis, and S. G. Georgopoulos

1457 **Efficacy of bactericides and saprophytic bacteria in reducing colonization and infection of pear flowers by Erwinia amylovora** ..... S. V. Thomson, M. N. Schroth, W. J. Moller, and W. O. Reil

1460 **Penetration of selectively toxic aromatic hydrocarbons into crown gall tumor cells** ..... L. W. Moore and M. N. Schroth

TECHNIQUES

1466 **A coconut-agar medium for rapid detection of aflatoxin production by Aspergillus spp.** ..... M. T. Lin and J. C. Dianese

1470 **Improved purification of rice dwarf virus by the use of polyethylene glycol** ..... I. Kimura

Index for 1976 ..... *1*
Erratum *20*
Tables of Contents for 1976 ..... *i*
